UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION

Country of Origin by Subgroup

JANUARY 1954

Prepared under the supervision of

J. EDWARD ELY

Chief, Foreign Trade Division

Bureau of the Census

BUREAU OF THE CENSUS LIBRARY

SPECIAL NOTICE

Effective January 1954 informal entry items valued $250 or less are included in the import statistics. Before using this report, see page 3 for explanation of this increase in coverage and of the sampling procedures instituted January 1954.

Issued April 1954

REPORT NO. FT 120

EXPLANATION OF CHANGES IN COVERAGE AND OF THE SAMPLING PROCEDURE FOR ESTIMATING IMPORTS IN SHIPMENTS INDIVIDUALLY VALUED $250 OR LESS

A. Increase in Coverage of Import Totals by Inclusion of Informal Entries.

Effective January 1954, the coverage of the United States import statistics has been broadened to include, on a sample basis, imports individually valued $250 or less reported on *informal* entries, which total approximately $4 million per month. Imports on informal entries have not been included in the import statistics prior to January 1954. As explained below, they are being included, effective with January 1954, in the over-all and summary totals only, and are *not* included in the statistics compiled for the individual Schedule A commodity classifications.

B. Decrease in Coverage in Detailed Import Statistics.

Also effective with the January 1954 statistics, information on immediate consumption imports individually valued $250 or less reported on *formal* entries totaling approximately $4 million per month, is no longer included in the statistics for the individual Schedule A commodity classifications[1]. Like the imports valued $250 or less on *informal* entries, they are being included in the statistics on a sample basis, in the over-all and summary totals only. Thus the low-value imports which, according to sample studies made, have generally similar commodity distribution whether covered by formal or informal entries, are treated uniformly in the statistics.

C. Reasons for Changes and Explanation as to Methods Adopted.

The February 1954 issue of *Foreign Trade Statistics Notes* contains an explanation regarding the increase in the value limit from $100 to $250 for informal entries, effective September 1953, under the Customs Simplification Act; the consequent need for including information on imports covered by informal entries in the statistics; and the reasons why the changes described above were made as a result of this need.

D. The Estimating Procedures.

For imports individually valued $250 or leas for both formal and informal entries, a 5 percent sample is taken, data are compiled from the sample and multiplied by 20 to obtain the estimates included in the statistics. These estimates are included only in the following summary totals:

1. The over-all import total (shown at the end of this report, labeled Grand Total).
2. The country totals (shown in this report).
3. The Customs District totals (not shown in this report, but published in FT 970).
4. The economic class totals (not shown in this report, but published in FT 930 and the *Quarterly Summary*).
5. The commodity subgroup and commodity group totals (included in summary table at the beginning of this report).

Imports on imports individually valued $250 or less is excluded, as mentioned above, from the statistics for individual Schedule A commodity classifications, and from all statistics for cross-classifications such as commodity by country, country by subgroup, etc.

E. Summary of Effects on Report No. FT 120 of the Changes in Coverage and the Estimating Procedure.

As a result of the changes described above, the data in report No. FT 120 effective January 1954 are affected as follows:

1. The subgroup summary table shown on page 8.
   (a) The total value shown for each subgroup includes the estimate, if any, of the imports valued $250 or less for the subgroup, as well as the compiled total for imports valued at more than $250. The accuracy of the subgroup total may be affected by the estimating procedure (see section H below). In addition, the comparability of the subgroup total with the corresponding total for months prior to January 1954 may be affected by the inclusion of informal entries effective in January 1954. (See section F below.)
   (b) In addition to the subgroup total, there is shown for each subgroup the estimated amount for imports individually valued $250 or less, if any, which has been included in the subgroup total. The difference between this estimated amount and the subgroup total is, of course, the fully compiled figure for imports individually valued at more than $250.
   (c) There is also shown for each subgroup the number of items in the sample on which the estimate of the low-value imports was based. Use of this number to evaluate the accuracy of the estimate is explained in section H below.
2. The country, country by commodity group, and country by commodity subgroup figures in the main part of the report.
   (a) Country totals. The country totals consist of fully compiled information for imports valued at more than $250 plus an estimate of the imports valued $250 or less. The estimated amount included for shipments of $250 or less is shown for each country under arbitrary subgroup 94 appearing at the end of all of the commodity subgroups for that country. The difference between the country total and this estimated amount is the fully compiled total of imports from the country individually valued at more than $250. The country total has been increased by the inclusion of informal entries effective in January. (See section F below.) In addition, the accuracy of the country total may be affected by the estimating procedure for the shipments of $250 or less. (See section H below.)
   (b) Country by subgroup totals. The country by subgroup figures do not include any information on imports valued $250 or less except that, as described in (a) above, the estimate of the low-value imports for the country is shown under arbitrary aubgroup 94.

[1]The terminology used in this statement, and in later references to "imports valued $250 or less covered by formal entries" is not strictly accurate, but has been adopted for convenience. Full compilation procedures are being continued for warehouse withdrawals, regardless of value.

Therefore, except for subgroup 94, the country by subgroup totals represent fully compiled figures for imports individually valued at more than $250. The coverage has been decreased by the exclusion of the $100 to $250 formal entry imports which were formerly included. (See sections G and I below.) For subgroup 94, the number of shipments in the sample upon which the estimate was based is shown at the right of the subgroup description. In order that the estimated data and the sample information may be readily identified, a double asterisk (**) appears at the right of the figure for the number in sample, immediately preceding the estimated value figure for subgroup 94. Use of the number in sample for subgroup 94 to evaluate the accuracy of the estimate and of the country total which includes it is explained in section H below. As in the past, country by subgroup items of less than $10,000 are combined on a commodity group basis. They are shown as "Subgroups valued under $10,000." However, in order that users may always be informed of the estimated amount for imports under $250 for a particular country, arbitrary subgroup 94 is always shown separately even if its value is less than $10,000. Therefore, if no item labeled subgroup 94 appears for a country, the user will know that no imports of $250 or less from that country appeared in the sample and no estimate for shipments of $250 or less is included in the country total.

(c) Country by group totals. The country by group totals other than for group 9 do not include any information on imports valued $250 or less. Coverage has been decreased by the exclusion of the $100 to $250 formal entry imports formerly included. The total for group 9 for the country includes the entire amount of the estimate of imports $250 or less for the country. This inclusion in group 9 is purely arbitrary, since the estimate covers all commodity groups for the country. See section H below in connection with evaluating the accuracy of the estimate.

F. The Effect of the Inclusion of Informal Entries in the Country Totals and Subgroup Totals Shown in this Report.

The import total has been increased by approximately $4 million because of the inclusion of informal entries. Some indication of the distribution of this increase by country may be available from tabulations prepared by the Bureau of the Census on the basis of the sample estimates. Users interested in this information for particular countries may make inquiry of the Bureau as to the information available. An indication of the distribution by subgroup, on the basis of a sample month, may be obtained from the article beginning on page 7 of the February 1954 *Notes*.

G. The Extent of Undercounting in Country by Subgroup and Country by Group Figures.

Only very rough measures can be given of the extent of undercounting which exists in the figures where the imports $250 or less are excluded.

1. The estimated total for imports individually valued $250 or less is $8 million per month ($4 million on informal and $4 million on formal entries). This represents about 1 percent of the total value of all imports. While the omission of the low-value shipments from the detailed statistics cannot, therefore have an important effect on the figures taken as a whole, it is possible that a high percentage of undercounting in individual detailed figures may result.
2. The estimate of the total imports valued $250 or less from the country is given in this report (arbitrary subgroup 94) and also the estimate of the low-value shipments for each subgroup (in the subgroup summary table). These figures may assist the user in estimating the degree of undercounting in the detailed figures from which the estimates are excluded. With allowances for sampling variability in the estimates (see section H below), the undercounting in a particular country by subgroup total would not be expected to be greater than the total amount of the low-value estimate for the country or than the total amount of the low-value estimate for the subgroup, whichever is less. In addition, the user's own knowledge of the usual pattern of shipments may enable him to make a rough approximation of the probabilities as to the distribution of the estimated total among the detailed items in the report.
3. Some indication of the undercounting on a 4-digit Schedule A commodity basis, without regard to country, is provided in the February 1954 *Notes*, in the form of data for a sample month.

H. The Accuracy of the Sample Estimates.

When statistics are estimated on the basis of a sample, exact agreement with the results that would have been obtained from a complete tabulation is not expected. The extent to which the estimated country totals and subgroup totals in this report for imports valued at $250 or less might not agree with a complete tabulation depends on the number of low-value shipments which fall in the sample. For each estimated figure in the report, the number in the sample on which the estimate was based is given.

As an example of the use of the table below, suppose an estimated value of $66,750 is based on 55 shipments in the sample. Referring to the line "50 - 64" one notes the values $14,200 and $16,000. This means that the chances are better than two out of three that a complete tabulation would have resulted in a figure between $52,550 ($66,750 reduced by $14,200) and $82,750 ($66,750 increased by $16,000). Similarly, a figure of $12,836,891 which represents a total of $12,770,141 for the fully compiled data for shipments valued at over $250 plus an estimated value of $66,750 based on 55 shipments in the sample would be between $12,822,691 ($12,836,891 reduced by $14,200) and $12,852,891 ($12,836,891 increased by $16,000).

In the event a user desires to combine two or more figures which are estimated values, or which include estimated values, the variability of the combined total can be determined by merely adding the sample size for each estimated value and then referring to the line on the reliability table applicable to the combined sample size.

The omission of (1) subgroup 94 for any country or (2) a figure in the $250 and under shipments included in

THE TABLE BELOW INOICATES THE OEGREE OF RELIABILITY TO BE ATTACHEO TO A SPECIFIED VALUE:

If the number of shipmenta valued at $250 or less included in the aample, as indicated by the aample card count, is	Then the chancea are better than 2 out of 3 that a complete tabulation whould have reaulted in a value figure between	
	The specified estimate reduced by [1]	And the specified estimated increased by
0	0	[2]$2,200
1	$1,600	4,400
2	2,500	5,100
3	3,200	5,600
4	3,700	6,100
5	4,200	6,500
6	4,600	6,900
7 or 8	5,400	7,600
9 or 10	6,000	8,100
11 - 14	6,800	8,800
15 - 19	7,600	9,600
20 - 29	9,100	10,900
30 - 39	10,800	12,600
40 - 49	12,400	14,200
50 - 64	14,200	18,000
65 - 79	16,000	17,800
80 - 99	17,900	19,700
100 - 124	20,300	22,100
125 - 149	22,500	24,200
150 - 174	24,700	25,800
175 - 199	26,200	28,000
200 - 249	29,000	30,800
250 - 299	32,000	33,800
300 - 399	37,000	39,000
400 - 499 [3]	41,900	43,600

[1] The limits shown in this column will of courae be too large if they exceed 1/20 of the estimate of the low valued imports.

[2] Where commodities normally are not imported, an indication of zero ahipments in the sample is, of courae, probably not underestimated to thia extent, if at all.

[3] If the number of shipments in the sample of $250 or less is greater than 499, then (a) the aampling variability for the estimates of the low-value shipments will generally be leaa than 7 percent; and (b) the sampling variability for the total of the fully compiled over $250 shipmenta and the eatimated amounts for ahipments valued $250 or less, combined, will generally be less than 1 percent.

the total" columns of the subgroup summary table on page 8 indicates that there were no imports valued at $250 or less appearing in the 5 percent sample for the country or subgroup and does not necessarily mean that low-value imports were not made. Similarly, the omission of a country name means that there were no imports valued at over $250 reported on formal consumption entries or any warehouse withdrawals for consumption and no imports valued at $250 or less appearing in the 5 percent sample.

I. Effect of Changes in Coverage on Comparability with Data for Periods Prior to January 1954

When using January 1954 or subsequent months' figures for purposes of comparison with figures for periods prior to January 1954, account must be taken of the coverage which was in effect for the earlier month, as well as the coverage effective January 1954. An article beginning on page 108 of the September 1953 *Notes* describes the coverage in effect for different periods of 1953. Coverage statements and explanations of any sampling procedures used are also included in the issues of Report No. FT 120 for the individual months of 1953. Since no information on imports covered by informal entries was included in any of the figures prior to January 1954, the country totals and subgroup totals (in the subgroup summary table) for January 1954 and subsequent months which include information on informal entries are not comparable in this respect to prior months. The country by subgroup and country by group figures (except group 9, as explained in section E, paragraph 2(c) above) in reports for January 1954 and subsequent months are comparable to months prior to January 1954 in the handling of information on informal entries, since no informal entry information is included in these detailed figures during either period. However, during the period July through December 1953, information on formal entries valued under $100 was excluded from the country by subgroup and country by group totals, and this would affect the comparability of the figures with those for other periods.

GENERAL EXPLANATION

COVERAGE

The import statistics include government as well as nongovernment shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from its territories and possessions and shipments between the territories and possessions are not reported as United States imports, but imports into Alaska, Hawaii, and Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of merchandise which moves into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value such as gifts valued at less than $100.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouse), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival, plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse, immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes. Information on merchandise withdrawn from bonded storage warehouses for exportation (not included in either imports for consumption or general imports) is also availabe for reference purposes.

Trade between the United States and its territories and possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of intransit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report, is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

VALUATION

The values are in general based on market or selling price, and are in general f.o.b. the exporting country. (Transportation costs to the United States may inadvertently be included in the case of merchandise which is not subject to an import duty based on value.) United States import duties are excluded.

COUNTRY OF ORIGIN

The country of origin is defined as the country where the merchandise was grown, mined or manufactured. In the event the importer can not readily obtain information as to the country of origin for a shipment, it is credited, for statistical purposes, to the country of shipment. Countries are reported as defined in Schedule C, *Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics*. Schedule C shows the descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of each country for statistical purposes. It is published as a part of Schedule A (see "Commodity Subgroup Information," below). A separate edition is also available free upon request to the Bureau of the Census. In this report countries are listed according to continents, in sequence within each continent from north to south and west to east, in accordance with their arrangement in Schedule C. The Table of Contents on page 7, which lists the countries in this order, will assist in locating the data for individual countries. The omission of a country name from this report indicates no imports from that country.

COMMODITY SUBGROUP INFORMATION

For presentation in this report, the commodity information compiled in terms of the classifications established in Schedule A, *Statistical Classification of Commodities Imported into the United States*, is summarized into approximately a hundred subgroups of related commodities. It is presented in the order in which the subgroup classifications are numbered in Schedule A. Reference to the table on page 8 will show the subgroup numbers, their unabbreviated descriptions, and the range of numbers of the individual Schedule A classifications included in each. For precise information as to the commodity content of individual subgroups, reference should be made to the descriptions in Schedule A of the numbered classifications included.

To save printing cost, complete country by subgroup information is not shown in this report. For each country, separate information is shown only for those subgroups whose individual totals for that country during the period covered by the report were $10,000 or more. Imports from each country of commodities falling in subgroups with individual totals of less than $10,000 for that country are presented as a combined total for each commodity group. Individual subgroup information for imports reported in these combined totals will be supplied upon request. A charge may be made to cover the cost of preparing this detailed information. The omission of a numbered subgroup under any country indicates no imports from that country, or imports less than $10,000.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report for earlier months of the current and previous year are shown at the back of the current month's report. With the exception of very important changes, any revisions to data for earlier years are held for reflection in the figures to be published in *Foreign Commerce and Navigation of the United States* for that year.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of *Foreign Commerce and Navigation of the United States*. Regular subscribers to FT reports are automatically supplied with copies of *Foreign Trade Statistics Notes*, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.). A catalog of *United States Foreign Trade Statistical Publications* is also available. Data in this report are available for reference purpoaes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports on a cost basis can also be arranged for to obtain additional detail compiled but not published. For free copies of the "Explanation of Statistics" or the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request ahould be made to the Bureau of the Cenaua.

import data on line labeled "1 TO 250 DOLLARS EST" are estimates based on 5% sample of informal entry and formal entry shipments valued $1-250. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk ("")] to determine the reliability of the sample, see page 5.

**Import data on line labeled "1 TO 250 DOLLARS EST" are estimates based on 6% sample of informal entry and formal entry shipments valued $1-250. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk ("*")] to determine the reliability of the sample, see page 5.

**Import data on line labeled "1 TO 250 DOLLARS EST" are estimates based on 5% sample of informal entry and formal entry shipments valued $1-250. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

** Import date on line labeled "1 TO 250 DOLLARS EST" are estimates based on 5% sample of informal entry and formal entry shipments valued $1-250. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample (shown immediately to the left of the double asterisk ("")) to determine the reliability of the sample, see page 5.

REPORT NO. FT 120

EXPLANATION OF CHANGES IN COVERAGE AND OF THE SAMPLING PROCEDURE FOR ESTIMATING IMPORTS IN SHIPMENTS INDIVIDUALLY VALUED $250 OR LESS

A. Increase in Coverage of Import Totals by Inclusion of Informal Entries.

Effective January 1954, the coverage of the United States import statistics has been broadened to include, on a sample basis, imports individually valued $250 or less reported on *informal* entries, which total approximately $4 million per month. Imports on informal entries have not been included in the import statistics prior to January 1954. As explained below, they are being included, effective with January 1954, in the over-all and summary totals only, and are *not* included in the statistics compiled for the individual Schedule A commodity classifications.

B. Decrease in Coverage in Detailed Import Statistics.

Also effective with the January 1954 statistics, information on immediate consumption imports individually valued $250 or less reported on *formal* entries totaling approximately $4 million per month, is no longer included in the statistics for the individual Schedule A commodity classifications[1]. Like the imports valued $250 or less on *informal* entries, they are being included in the statistics on a sample basis, in the over-all and summary totals only. Thus the low-value imports which, according to sample studies made, have generally similar commodity distribution whether covered by formal or informal entries, are treated uniformly in the statistics.

C. Reasons for Changes and Explanation as to Methods Adopted.

The February 1954 issue of *Foreign Trade Statistics Notes* contains an explanation regarding the increase in the value limit from $100 to $250 for informal entries, effective September 1953, under the Customs Simplification Act; the consequent need for including information on imports covered by informal entries in the statistics; and the reasons why the changes described above were made as a result of this need.

D. The Estimating Procedures.

For imports individually valued $250 or less for both formal and informal entries, a 5 percent sample is taken, data are compiled from the sample and multiplied by 20 to obtain the estimates included in the statistics. These estimates are included only in the following summary totals:

1. The over-all import total (shown at the end of this report, labeled Grand Total).
2. The country totals (shown in this report).
3. The Customs District totals (not shown in this report, but published in FT 970).
4. The economic class totals (not shown in this report, but published in FT 930 and the *Quarterly Summary*).
5. The commodity subgroup and commodity group totals (included in summary table at the beginning of this report).

Information on imports individually valued $250 or less is excluded, as mentioned above, from the statistics for individual Schedule A commodity classifications, and from all statistics for cross-classifications such as commodity by country, country by subgroup, etc.

E. Summary of Effects on Report No. FT 120 of the Changes in Coverage and the Estimating Procedure.

As a result of the changes described above, the data in report No. FT 120 effective January 1954 are affected as follows:

1. The subgroup summary table shown on page 8.
   (a) The total value shown for each subgroup includes the estimate, if any, of the imports valued $250 or less for the subgroup, as well as the compiled total for imports valued at more than $250. The accuracy of the subgroup total may be affected by the estimating procedure (see section H below). In addition, the comparability of the subgroup total with the corresponding total for months prior to January 1954 may be affected by the inclusion of informal entries effective in January 1954. (See section F below.)
   (b) In addition to the subgroup total, there is shown for each subgroup the estimated amount for imports individually valued $250 or less, if any, which has been included in the subgroup total. The difference between this estimated amount and the subgroup total is, of course, the fully compiled figure for imports individually valued at more than $250.
   (c) There is also shown for each subgroup the number of items in the sample on which the estimate of the low-value imports was based. Use of this number to evaluate the accuracy of the estimate is explained in section H below.
2. The country, country by commodity group, and country by commodity subgroup figures in the main part of the report.
   (a) Country totals. The country totals consist of fully compiled information for imports valued at more than $250 plus an estimate of the imports valued $250 or less. The estimated amount included for shipments of $250 or less is shown for each country under arbitrary subgroup 94 appearing at the end of all of the commodity subgroups for that country. The difference between the country total and this estimated amount is the fully compiled total of imports from the country individually valued at more than $250. The country total has been increased by the inclusion of informal entries effective in January. (See section F below.) In addition, the accuracy of the country total may be affected by the estimating procedure for the shipments of $250 or less. (See section H below.)
   (b) Country by subgroup totals. The country by subgroup figures do not include any information on imports valued $250 or less except that, as described in (a) above, the estimate of the low-value imports for the country is shown under arbitrary subgroup 94.

[1]The terminology used in this statement, and in later references to "imports valued $250 or less covered by formal entries" is not strictly accurate, but has been adopted for convenience. Full compilation procedures are being continued for warehouse withdrawals, regardless of value.

Therefore, except for subgroup 94, the country by subgroup totals represent fully compiled figures for imports individually valued at more than $250. The coverage has been decreased by the exclusion of the $100 to $250 formal entry imports which were formerly included. (See sections G and I below.) For subgroup 94, the number of shipments in the sample upon which the estimate was based is shown at the right of the subgroup description. In order that the estimated data and the sample information may be readily identified, a double asterisk (**) appears at the right of the figure for the number in sample, immediately preceding the estimated value figure for subgroup 94. Use of the number in sample for subgroup 94 to evaluate the accuracy of the estimate and of the country total which includes it is explained in section H below. As in the past, country by subgroup items of less than $10,000 are combined on a commodity group basis. They are shown as "Subgroups valued under $10,000." However, in order that users may always be informed of the estimated amount for imports under $250 for a particular country, arbitrary subgroup 94 is always shown separately even if its value is less than $10,000. Therefore, if no item labeled subgroup 94 appears for a country, the user will know that no imports of $250 or less from that country appeared in the sample and no estimate for shipments of $250 or less is included in the country total.

(c) Country by group totals. The country by group totals other than for group 9 do not include any information on imports valued $250 or less. Coverage has been decreased by the exclusion of the $100 to $250 formal entry imports formerly included. The total for group 9 for the country includes the entire amount of the estimate of imports $250 or less for the country. This inclusion in group 9 is purely arbitrary, since the estimate covers all commodity groups for the country. See section H below in connection with evaluating the accuracy of the estimate.

F. The Effect of the Inclusion of Informal Entries in the Country Totals and Subgroup Totals Shown in this Report.

The import total has been increased by approximately $4 million because of the inclusion of informal entries. Some indication of the distribution of this increase by country may be available from tabulations prepared by the Bureau of the Census on the basis of the sample estimates. Users interested in this information for particular countries may make inquiry of the Bureau as to the information available. An indication of the distribution by subgroup, on the basis of a sample month, may be obtained from the article beginning on page 7 of the February 1954 *Notes*.

G. The Extent of Undercounting in Country by Subgroup and Country by Group Figures.

Only very rough measures can be given of the extent of undercounting which exists in the figures where the imports $250 or less are excluded.

1. The estimated total for imports individually valued $250 or less is $8 million per month ($4 million on informal and $4 million on formal entries). This represents about 1 percent of the total value of all imports. While the omission of the low-value shipments from the detailed statistics cannot, therefore have an important effect on the figures taken as a whole, it is possible that a high percentage of undercounting in individual detailed figures may result.
2. The estimate of the total imports valued $250 or less from the country is given in this report (arbitrary subgroup 94) and also the estimate of the low-value shipments for each subgroup (in the subgroup summary table). These figures may assist the user in estimating the degree of undercounting in the detailed figures from which the estimates are excluded. With allowances for sampling variability in the estimates (see section H below), the undercounting in a particular country by subgroup total would not be expected to be greater than the total amount of the low-value estimate for the country or than the total amount of the low-value estimate for the subgroup, whichever is less. In addition, the user's own knowledge of the usual pattern of shipments may enable him to make a rough approximation of the probabilities as to the distribution of the estimated total among the detailed items in the report.
3. Some indication of the undercounting on a 4-digit Schedule A commodity basis, without regard to country, is provided in the February 1954 *Notes*, in the form of data for a sample month.

H. The Accuracy of the Sample Estimates.

When statistics are estimated on the basis of a sample, exact agreement with the results that would have been obtained from a complete tabulation is not expected. The extent to which the estimated country totals and subgroup totals in this report for imports valued at $250 or less might not agree with a complete tabulation depends on the number of low-value shipments which fall in the sample. For each estimated figure in the report, the number in the sample on which the estimate was based is given.

As an example of the use of the table below, suppose an estimated value of $66,750 is based on 55 shipments in the sample. Referring to the line "50 - 64" one notes the values $14,200 and $16,000. This means that the chances are better than two out of three that a complete tabulation would have resulted in a figure between $52,550 ($66,750 reduced by $14,200) and $82,750 ($66,750 increased by $16,000). Similarly, a figure of $12,836,891 which represents a total of $12,770,141 for the fully compiled data for shipments valued at over $250 plus an estimated value of $66,750 based on 55 shipments in the sample would be between $12,822,691 ($12,836,891 reduced by $14,200) and $12,852,891 ($12,836,891 increased by $16,000).

In the event a user desires to combine two or more figures which are estimated values, or which include estimated values, the variability of the combined total can be determined by merely adding the sample size for each estimated value and then referring to the line on the reliability table applicable to the combined sample size.

The omission of (1) subgroup 94 for any country or (2) a figure in the $250 and under shipments included in

THE TABLE BELOW INDICATES THE DEGREE OF RELIABILITY TO BE ATTACHED TO A SPECIFIED VALUE:

If the number of shipments valued at $250 or less included in the sample, as indicated by the sample card count, is	Then the chances are better than 2 out of 3 that a complete tabulation should have resulted in a value figure between	
	The specified estimate reduced by[1]	And the specified estimated increased by
0	0	[2]$2,200
1	$1,600	4,400
2	2,500	5,100
3	3,200	5,600
4	3,700	6,100
5	4,200	6,500
6	4,600	6,900
7 or 8	5,400	7,600
9 or 10	6,000	8,100
11 - 14	6,800	8,800
15 - 19	7,600	9,600
20 - 29	9,100	10,900
30 - 39	10,800	12,600
40 - 49	12,400	14,200
50 - 64	14,200	16,000
65 - 79	16,000	17,800
80 - 99	17,900	19,700
100 - 124	20,300	22,100
125 - 149	22,500	24,200
150 - 174	24,700	25,800
175 - 199	26,200	28,000
200 - 249	29,000	30,800
250 - 299	32,000	33,800
300 - 399	37,000	39,000
400 - 499[3]	41,900	43,600

[1]The limits shown in this column will of course be too large if they exceed 1/20 of the estimate of the low valued imports.

[2]Where commodities normally are not imported, an indication of zero shipments in the sample is, of course, probably not underestimated to this extent, if at all.

[3]If the number of shipments in the sample of $250 or less is greater than 499, then (a) the sampling variability for the estimates of the low-value shipments will generally be less than 7 percent; and (b) the sampling variability for the total of the fully compiled over $250 shipments and the estimated amounts for shipments valued $250 or less, combined, will generally be less than 1 percent.

the total" columns of the subgroup summary table on page 8 indicates that there were no imports valued at $250 or less appearing in the 5 percent sample for the country or subgroup and does not necessarily mean that low-value imports were not made. Similarly, the omission of a country name means that there were no imports valued at over $250 reported on formal consumption entries or any warehouse withdrawals for consumption and no imports valued at $250 or less appearing in the 5 percent sample.

I. Effect of Changes in Coverage on Comparability with Data for Periods Prior to January 1954

When using January 1954 or subsequent months' figures for purposes of comparison with figures for periods prior to January 1954, account must be taken of the coverage which was in effect for the earlier month, as well as the coverage effective January 1954. An article beginning on page 108 of the September 1953 *Notes* describes the coverage in effect for different periods of 1953. Coverage statements and explanations of any sampling procedures used are also included in the issues of Report No. FT 120 for the individual months of 1953. Since no information on imports covered by informal entries was included in any of the figures prior to January 1954, the country totals and subgroup totals (in the subgroup summary table) for January 1954 and subsequent months which include information on informal entries are not comparable in this respect to prior months. The country by subgroup and country by group figures (except group 9, as explained in section E, paragraph 2(c) above) in reports for January 1954 and subsequent months are comparable to months prior to January 1954 in the handling of information on informal entries, since no informal entry information is included in these detailed figures during either period. However, during the period July through December 1953, information on formal entries valued under $100 was excluded from the country by subgroup and country by group totals, and this would affect the comparability of the figures with those for other periods.

GENERAL EXPLANATION

COVERAGE

The import statistics include government as well as nongovernment shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from its territories and possessions and shipments between the territories and possessions are not reported as United States imports, but imports into Alaska, Hawaii, and Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of merchandise which moves into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value such as gifts valued at less than $100.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouse), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival, plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse, immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes. Information on merchandise withdrawn from bonded storage warehouses for exportation (not included in either imports for consumption or general imports) is also availabe for reference purposes.

Trade between the United States and its territories and possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of intransit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report, is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

VALUATION

The values are in general based on market or selling price, and are in general f.o.b. the exporting country. (Transportation costs to the United States may inadvertently be included in the case of merchandise which is not subject to an import duty based on value.) United States import duties are excluded.

COUNTRY OF ORIGIN

The country of origin is defined as the country where the merchandise was grown, mined or manufactured. In the event the importer can not readily obtain information as to the country of origin for a shipment, it is credited, for statistical purposes, to the country of shipment. Countries are reported as defined in Schedule C, *Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics*. Schedule C shows the descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of each country for statistical purposes. It is published as a part of Schedule A (see "Commodity Subgroup Information," below). A separate edition is also available free upon request to the Bureau of the Census. In this report countries are listed according to continents, in sequence within each continent from north to south and west to east, in accordance with their arrangement in Schedule C. The Table of Contents on page 7, which lists the countries in this order, will assist in locating the data for individual countries. The omission of a country name from this report indicates no imports from that country.

COMMODITY SUBGROUP INFORMATION

For presentation in this report, the commodity information compiled in terms of the classifications established in Schedule A, *Statistical Classification of Commodities Imported into the United States*, is summarized into approximately a hundred subgroups of related commodities. It is presented in the order in which the subgroup classifications are numbered in Schedule A. Reference to the table on page 8 will show the subgroup numbers, their unabbreviated descriptions, and the range of numbers of the individual Schedule A classifications included in each. For precise information as to the commodity content of individual subgroups, reference should be made to the descriptions in Schedule A of the numbered classifications included.

To save printing cost, complete country by subgroup information is not shown in this report. For each country, separate information is shown only for those subgroups whose individual totals for that country during the period covered by the report were $10,000 or more. Imports from each country of commodities falling in subgroups with individual totals of less than $10,000 for that country are presented as a combined total for each commodity group. Individual subgroup information for imports reported in these combined totals will be supplied upon request. A charge may be made to cover the cost of preparing this detailed information. The omission of a numbered subgroup under any country indicates no imports from that country, or imports less than $10,000.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report for earlier months of the current and previous year are shown at the back of the current month's report. With the exception of very important changes, any revisions to data for earlier years are held for reflection in the figures to be published in *Foreign Commerce and Navigation of the United States* for that year.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of *Foreign Commerce and Navigation of the United States*. Regular subscribers to FT reports are automatically supplied with copies of *Foreign Trade Statistics Notes*, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.). A catalog of *United States Foreign Trade Statistical Publications* is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports on a cost basis can also be arranged for to obtain additional detail compiled but not published. For free copies of the "Explanation of Statistics" or the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

**"Import data on line labeled "1 TO 250 DOLLARS EST" are estimates based on 5% sample of informal entry and formal entry shipments valued $1-250. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk ("*")] to determine the reliability of the sample, see page 5.

**Import date on line labeled "1 TO 250 DOLLARS EST" are estimates based on 5% sample of informal entry and formal entry shipments valued $1-250. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk ("")] to determine the reliability of the sample, see page 5.

**Import data on line labeled "1 TO 250 DOLLARS EST" are estimates based on 6% sample of informal entry and formal entry shipments valued $1-250. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk ("*")] to determine the reliability of the sample, see page 6.

**Import date on line labeled "1 TO 250 DOLLARS EST" are estimates based on 6% sample of informal entry and formal entry shipments valued $1-250. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "1 TO 250 DOLLARS EST" are estimates based on 5% sample of informal entry and formal entry shipments valued $1-250. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk ("*")] to determine the reliability of the sample, see page 5.

**Import data on line labeled "1 TO 250 DOLLARS EST" are estimates based on 5% sample of informal entry and formal entry shipments valued $1-250. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**import data on line labeled "1 TO 250 DOLLARS EST" are estimates based on 5% sample of informal entry and formal entry shipments valued $1-250. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample (shown immediately to the left of the double asterisk (**)) to determine the reliability of the sample, see page 5.

REPORT NO. FT 120

EXPLANATION OF CHANGES IN COVERAGE AND OF THE SAMPLING PROCEDURE FOR ESTIMATING IMPORTS IN SHIPMENTS INDIVIDUALLY VALUED $250 OR LESS

A. Increase in Coverage of Import Totals by Inclusion of Informal Entries.

Effective January 1954, the coverage of the United States import statistics has been broadened to include, on a sample basis, imports individually valued $250 or less reported on *informal* entries, which total approximately $4 million per month. Imports on informal entries have not been included in the import statistics prior to January 1954. As explained below, they are being included, effective with January 1954, in the over-all and summary totals only, and are *not* included in the statistics compiled for the individual Schedule A commodity classifications.

B. Decrease in Coverage in Detailed Import Statistics.

Also effective with the January 1954 statistics, information on immediate consumption imports individually valued $250 or less reported on *formal* entries totaling approximately $4 million per month, is no longer included in the statistics for the individual Schedule A commodity classifications[1]. Like the imports valued $250 or less on *informal* entries, they are being included in the statistics on a sample basis, in the over-all and summary totals only. Thus the low-value imports which, according to sample studies made, have generally similar commodity distribution whether covered by formal or informal entries, are treated uniformly in the statistics.

C. Reasons for Changes and Explanation as to Methods Adopted.

The February 1954 issue of *Foreign Trade Statistics Notes* contains an explanation regarding the increase in the value limit from $100 to $250 for informal entries, effective September 1953, under the Customs Simplification Act; the consequent need for including information on imports covered by informal entries in the statistics; and the reasons why the changes described above were made as a result of this need.

D. The Estimating Procedures.

For imports individually valued $250 or less for both formal and informal entries, a 5 percent sample is taken, data are compiled from the sample and multiplied by 20 to obtain the estimates included in the statistics. These estimates are included only in the following summary totals:

1. The over-all import total (shown at the end of this report, labeled Grand Total).
2. The country totals (shown in this report).
3. The Customs District totals (not shown in this report, but published in FT 970).
4. The economic class totals (not shown in this report, but published in FT 930 and the *Quarterly Summary*).
5. The commodity subgroup and commodity group totals (included in summary table at the beginning of this report).

Information on imports individually valued $250 or less is excluded, as mentioned above, from the statistics for individual Schedule A commodity classifications, and from all statistics for cross-classifications such as commodity by country, country by subgroup, etc.

E. Summary of Effects on Report No. FT 120 of the Changes in Coverage and the Estimating Procedure.

As a result of the changes described above, the data in report No. FT 120 effective January 1954 are affected as follows:

1. The subgroup summary table shown on page 8.
   (a) The total value shown for each subgroup includes the estimate, if any, of the imports valued $250 or less for the subgroup, as well as the compiled total for imports valued at more than $250. The accuracy of the subgroup total may be affected by the estimating procedure (see section H below). In addition, the comparability of the subgroup total with the corresponding total for months prior to January 1954 may be affected by the inclusion of informal entries effective in January 1954. (See section F below.)
   (b) In addition to the subgroup total, there is shown for each subgroup the estimated amount for imports individually valued $250 or less, if any, which has been included in the subgroup total. The difference between this estimated amount and the subgroup total is, of course, the fully compiled figure for imports individually valued at more than $250.
   (c) There is also shown for each subgroup the number of items in the sample on which the estimate of the low-value imports was based. Use of this number to evaluate the accuracy of the estimate is explained in section H below.
2. The country, country by commodity group, and country by commodity subgroup figures in the main part of the report.
   (a) Country totals. The country totals consist of fully compiled information for imports valued at more than $250 plus an estimate of the imports valued $250 or less. The estimated amount included for shipments of $250 or less is shown for each country under arbitrary subgroup 94 appearing at the end of all of the commodity subgroups for that country. The difference between the country total and this estimated amount is the fully compiled total of imports from the country individually valued at more than $250. The country total has been increased by the inclusion of informal entries effective in January. (See section F below.) In addition, the accuracy of the country total may be affected by the estimating procedure for the shipments of $250 or less. (See section H below.)
   (b) Country by subgroup totals. The country by subgroup figures do not include any information on imports valued $250 or less except that, as described in (a) above, the estimate of the low-value imports for the country is shown under arbitrary subgroup 94.

[1]The terminology used in this statement, and in later references to "imports valued $250 or less covered by formal entries" is not strictly accurate, but has been adopted for convenience. Full compilation procedures are being continued for warehouse withdrawals, regardless of value.

Therefore, except for subgroup 94, the country by subgroup totals represent fully compiled figures for imports individually valued at more than $250. The coverage has been decreased by the exclusion of the $100 to $250 formal entry imports which were formerly included. (See sectiona G and I below.) For subgroup 94, the number of shipments in the sample upon which the estimate was based is shown at the right of the subgroup description. In order that the estimated dataand the sample information may be readily identified, a double asterisk (**) appears at the right of the figure forthe number in sample, immediately preceding the estimated value figure for subgroup 94. Use of the number in sample for subgroup 94 to evaluate the accuracy of the estimate and of the country total which includes it is explained in section H below. As in the past, country by subgroup items of less than $10,000 are combined on a commodity group basis. They are shown as "Subgroups valued under $10,000." However, in order that users may always be informed of the estimated amount for imports under $250 for a particular country, arbitrary subgroup 94 is always shown separately even if its value is less than $10,000. Therefore, if no item labeled subgroup 94 appears for a country, the user will know that no imports of $250 or less from that country appeared in the sample and no estimate for shipments of $250 or less is included in the country total.

(c) Country by group totals. The country by group totals other than for group 9 do not include any information on imports valued $250 or less. Coverage has been decreased by the exclusion of the $100 to $250 formal entry imports formerly included. The total for group 9 for the country includes the entire amount of the estimate of imports $250 or less for the country. This inclusion in group 9 is purely arbitrary, since the estimate covers all commodity groups for the country. See section H below in connection with evaluating the accuracy of the estimate.

F. The Effect of the Incluaion of Informal Entriea in the Country Totala and Subgroup Totals Shown in this Report.

The import total has been increased by approximately $4 million because of the inclusion of informal entries. Some indication of the distribution of this increase by country may be available from tabulations prepared by the Bureau of the Census on the basis of the sample estimates. Users interested in this information for particular countries may make inquiry of the Bureau as to the information available. An indication of the distribution by subgroup, on the basis of a sample month, may be obtained from the article beginning on page 7 of the February 1954 *Notes*.

G. The Extent of Undercounting in Country by Subgroup and Country by Group Figurea.

Only very rough measures can be given of the extent of undercounting which exists in the figures where the imports $250 or less are excluded.

1. The estimated total for imports individually valued $250 or less is $8 million per month ($4 million on informal and $4 million on formal entries). This represents about 1 percent of the total value of all imports. While the omission of the low-value shipments from the detailed statistics cannot, therefore have an important effect on the figures taken as a whole, it is possible that a high percentage of undercounting in individual detailed figures may result.
2. The estimate of the total imports valued $250 or less from the country is given in this report (arbitrary subgroup 94) and also the estimate of the low-value shipments for each subgroup (in the subgroup summary table). These figures may assist the user in estimating the degree of undercounting in the detailed figures from which the eatimates are excluded. With allowances for sampling variability in the estimates (see section H below), the undercounting in a particular country by subgroup total would not be expected to be greater than the total amount of the low-value estimate for the country or than the total amount of the low-value eatimate for the subgroup, whichever is less. In addition, the user's own knowledge of the usual pattern of shipments may enable him to make a rough approximation of the probabilities as to the distribution of the estimated total among the detailed items in the report.
3. Some indication of the undercounting on a 4-digit Schedule A commodity basis, without regard to country, is provided in the February 1954 *Notes*, in the form of data for a aample month.

H. The Aceuracy of the Sample Estimatea.

When statistics are estimated on the basis of a sample, exact agreement with the results that would have been obtained from a complete tabulation is not expected. The extent to which the estimated country totals and subgroup totals in this report for imports valued at $250 or leas might not agree with a complete tabulation depends on the number of low-value shipments which fall in the sample. For each estimated figure in the report, the number in the sample on which the estimate was based is given.

As an example of the use of the table below, suppose an estimated value of $66,750 is baseo on 55 shipments in the sample. Referring to the line "50 - 64" one notes the values $14,200 and $16,000. Thia means that the chances are better than two out of three that a complete tabulation would have resulted in a figure between $52,550 ($66,750 reduced by $14,200) and $82,750 ($66,750 increased by $16,000). Similarly, a figure of $12,836,891 which represents a total of $12,770,141 for the fully compiled data for shipmenta valued at over $250 plus an estimated value of $66,750 based on 55 shipments in the sample would be between $12,822,691 ($12,836,891 reduced by $14,200) and $12,852,891 ($12,836,891 increased by $16,000).

In the event a user desires to combine two or more figures which are estimated values, or which include estimated values, the variability of the combined total can be determined by merely adding the sample size for each estimated value and then referring to the line on the reliability table applicable to the combined aample size.

The omission of (1) subgroup 94 for any country or (2) a figure in the $250 and under shipments included in

THE TABLE BELOW INDICATES THE DEGREE OF RELIABILITY TO BE ATTACHED TO A SPECIFIED VALUE:

If the number of shipments valued at $250 or less included in the sample, as indicated by the sample card count, is	Then the chances are better than 2 out of 3 that a complete tabulation whould have resulted in a value figure between	
	The specified estimate reduced by[1]	And the specified estimated increased by
0	0	[2]$2,200

250 - 299	32,000	33,800
300 - 399	37,000	39,000
400 - 499[3]	41,900	43,600

[1] The minimum value for imports $1 to $250 is 1/20 of the estimated amount shown in the report. If the reduction of a particular low-value estimate by the amount shown in this column results in a figure which is less than 1/20 of the estimate, then for that figure this table overstates the amount by which complete tabulation could have reduced the value. The minimum value for any subgroup or country total is the fully compiled figure for imports $250 or more plus 1/20 of the estimated amount shown for $1 to $250 imports. (The fully compiled country total for imports $250 or more can be derived by subtracting from the country total the value shown for subgroup 94, "1 TO 250 DOLLARS EST," for that country.)

[2] Where commodities normally are not imported, an indication of zero shipments in the sample is, of course, probably not underestimated to this extent, if at all.

[3] If the number of shipments in the sample of $250 or less is greater than 499, then (a) the sampling variability for the estimates of the low-value shipments will generally be less than 7 percent; and (b) the sampling variability for the total of the fully compiled over $250 shipments and the estimated amounts for shipments valued $250 or less, combined, will generally be less than 1 percent.

the total" columns of the subgroup summary table on page 8 indicates that there were no imports valued at $250 or less appearing in the 5 percent sample for the country or subgroup and does not necessarily mean that low-value imports were not made. Similarly, the omission of a country name means that there were no imports valued at over $250 reported on formal consumption entries or any warehouse withdrawals for consumption and no imports valued at $250 or less appearing in the 5 percent sample.

I. Effect of Changes in Coverage on Comparability with Data for Periods Prior to January 1954

When using January 1954 or subsequent months' figures for purposes of comparison with figures for periods prior to January 1954, account must be taken of the coverage which was in effect for the earlier month, as well as the coverage effective January 1954. An article beginning on page 108 of the September 1953 *Notes* describes the coverage in effect for different periods of 1953. Coverage statements and explanations of any sampling procedures used are also included in the issues of Report No. FT 120 for the individual months of 1953. Since no information on imports covered by informal entries was included in any of the figures prior to January 1954, the country totals and subgroup totals (in the subgroup summary table) for January 1954 and subsequent months which include information on informal entries are not comparable in this respect to prior months. The country by subgroup and country by group figures (except group 9, as explained in section E, paragraph 2(c) above) in reports for January 1954 and subsequent months are comparable to months prior to January 1954 in the handling of information on informal entries, since no informal entry information is included in these detailed figures during either period. However, during the period July through December 1953, information on formal entries valued under $100 was excluded from the country by subgroup and country by group totals, and this would affect the comparability of the figures with those for other periods.

BUREAU OF THE CENSUS LIBRARY

GENERAL EXPLANATION

COVERAGE

The import statistics include government as well as nongovernment shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from its territories and possessions and shipments between the territories and possessions are not reported as United States imports, but imports into Alaska, Hawaii, and Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of merchandise which moves into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value such as gifts valued at less than $100.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouse), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival, plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse, immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes. Information on merchandise withdrawn from bonded storage warehouses for exportation (not included in either imports for consumption or general imports) is also availabe for reference purposes.

Trade between the United States and its territories and possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of intransit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report, is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

VALUATION

The values are in general based on market or selling price, and are in general f.o.b. the exporting country. (Transportation costs to the United States may inadvertently be included in the case of merchandise which is not subject to an import duty based on value.) United States import duties are excluded.

COUNTRY OF ORIGIN

The country of origin is defined as the country where the merchandise was grown, mined or manufactured. In the event the importer can not readily obtain information as to the country of origin for a shipment, it is credited, for statistical purposes, to the country of shipment. Countries are reported as defined in Schedule C, *Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics*. Schedule C shows the descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of each country for statistical purposes. It is published as a part of Schedule A (see "Commodity Subgroup Information," below). A separate edition is also available free upon request to the Bureau of the Census. In this report countries are listed according to continents, in sequence within each continent from north to south and west to east, in accordance with their arrangement in Schedule C. The Table of Contents on page 7, which lists the countries in this order, will assist in locating the data for individual countries. The omission of a country name from this report indicates no imports from that country.

COMMODITY SUBGROUP INFORMATION

For presentation in this report, the commodity information compiled in terms of the classifications established in Schedule A, *Statistical Classification of Commodities Imported into the United States*, is summarized into approximately a hundred subgroups of related commodities. It is presented in the order in which the subgroup classifications are numbered in Schedule A. Reference to the table on page 8 will show the subgroup numbers, their unabbreviated descriptions, and the range of numbers of tbe individual Schedule A classifications included in each. For precise information as to the commodity content of individual subgroups, reference should be made to the descriptions in Schedule A of the numbered classifications included.

To save printing cost, complete country by subgroup information is not shown in this report. For each country, separate information is shown only for those subgroups whose individual totals for that country during the period covered by the report were $10,000 or more. Imports from each country of commodities falling in subgroups with individual totals of less than $10,000 for that country are presented as a combined total for each commodity group. Individual subgroup information for imports reported in theae combined totals will be supplied upon request. A charge may be made to cover the cost of preparing this detailed information. The omission of a numbered subgroup under any country indicates no imports from that country, or imports less than $10,000.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report for earlier months of the current and previous year are shown at the back of the current month's report. With the exception of very important changes, any revisions to data for earlier years are held for reflection in the figures to be published in *Foreign Commerce and Navigation of the United States* for that year.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of *Foreign Commerce and Navigation of the United States*. Regular subscribers to FT reports are automatically supplied with copies of *Foreign Trade Statistics Notes*, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.). A catalog of *United States Foreign Trade Statistical Publications* is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports on a cost basis can also be arranged for to obtain additional detail compiled but not published. For free copies of the "Explanation of Statistics" or the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

**Import data on line labeled "1 TO 250 DOLLARS EST" are estimates based on 5% sample of informal entry and formal entry shipments valued $1-250. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk ("*")] to determine the reliability of the sample, see page 5.

**Import data on line labeled "1 TO 250 DOLLARS EST" are estimates based on 5% sample of informal entry and formal entry shipments valued $1-250. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk ("*")] to determine the reliability of the sample, see page 5.

Import data on line labeled "1 TO 250 DOLLARS EST" are estimates based on 5% sample of informal entry and formal entry shipments valued $1-250. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 8.

**Import data on line labeled "1 TO 250 DOLLARS EST" are estimates based on 5% sample of informal entry and formal entry shipments valued $1-250. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk ("*")] to determine the reliability of the sample, see page 5.

**Import date on line labeled "1 TO 250 DOLLARS EST" are estimates based on 5% sample of informal entry and formal entry shipments valued $1-250. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample (shown immediately to the left of the double asterisk ("*")) to determine the reliability of the sample, see page 5.

DATA FOR "1-250 DOLLAR EST" NOT SEPARATELY REPORTED FOR SOME COUNTRIES IN JANUARY AND FEBRUARY 1954 REPORT NO. FT 120

As a result of errors in the machine tabulation processing of the January and February 1954 issues of Report No. FT 120, United States Imports of Merchandise for Consumption, Country of Origin by Subgroup, the estimated value for shipments valued at $1 to $250 (subgroup code number 94) was not separately reported for some countries but was included under the designation "SUBGROUPS VALUED UNDER $10,000 - GROUP 9."

The data for shipments valued $1 - $250 which were not shown separately are shown below by country. These data should be subtracted from the data shown for "SUBGROUPS VALUED UNDER $10,000 - GROUP 9." The country totals and the group 9 totals for each of the countries shown below are correct as reported:

REPORT NO. FT 120

EXPLANATION OF CHANGES IN COVERAGE AND OF THE SAMPLING PROCEDURE FOR ESTIMATING IMPORTS IN SHIPMENTS INDIVIDUALLY VALUED $250 OR LESS

A. Increase in Coverage of Import Totals by Inclusion of Informal Entries.

Effective January 1954, the coverage of the United States import statistics has been broadened to include, on a sample basis, imports individually valued $250 or less reported on *informal* entries, which total approximately $4 million per month. Imports on informal entries have not been included in the import statistics prior to January 1954. As explained below, they are being included, effective with January 1954, in the over-all and summary totals only, and are *not* included in the statistics compiled for the individual Schedule A commodity classifications.

B. Decrease in Coverage in Detailed Import Statistics.

Also effective with the January 1954 statistics, information on immediate consumption imports individually valued $250 or less reported on *formal* entries totaling approximately $4 million per month, is no longer included in the statistics for the individual Schedule A commodity classifications[1]. Like the imports valued $250 or less on *informal* entries, they are being included in the statistics on a sample basis, in the over-all and summary totals only. Thus the low-value imports which, according to sample studies made, have generally similar commodity distribution whether covered by formal or informal entries, are treated uniformly in the statistics.

C. Reasons for Changes and Explanation as to Methods Adopted.

The February 1954 issue of *Foreign Trade Statistics Notes* contains an explanation regarding the increase in the value limit from $100 to $250 for informal entries, effective September 1953, under the Customs Simplification Act; the consequent need for including information on imports covered by informal entries in the statistics; and the reasons why the changes described above were made as a result of this need.

D. The Estimating Procedures.

For imports individually valued $250 or less for both formal and informal entries, a 5 percent sample is taken, data are compiled from the sample and multiplied by 20 to obtain the estimates included in the statistics. These estimates are included only in the following summary totals:

1. The over-all import total (shown at the end of this report, labeled Grand Total).
2. The country totals (shown in this report).
3. The Customs District totals (not shown in this report, but published in FT 970).
4. The economic class totals (not shown in this report, but published in FT 930 and the *Quarterly Summary*).
5. The commodity subgroup and commodity group totals (included in summary table at the beginning of this report).

Information on imports individually valued $250 or less is excluded, as mentioned above, from the statistics for individual Schedule A commodity classifications, and from all statistics for cross-classifications such as commodity by country, country by subgroup, etc.

E. Summary of Effects on Report No. FT 120 of the Changes in Coverage and the Estimating Procedure.

As a result of the changes described above, the data in report No. FT 120 effective January 1954 are affected as follows:

1. The subgroup summary table shown on page 8.
   (a) The total value shown for each subgroup includes the estimate, if any, of the imports valued $250 or less for the subgroup, as well as the compiled total for imports valued at more than $250. The accuracy of the subgroup total may be affected by the estimating procedure (see section H below). In addition, the comparability of the subgroup total with the corresponding total for months prior to January 1954 may be affected by the inclusion of informal entries effective in January 1954. (See section F below.)
   (b) In addition to the subgroup total, there is shown for each subgroup the estimated amount for imports individually valued $250 or less, if any, which has been included in the subgroup total. The difference between this estimated amount and the subgroup total is, of course, the fully compiled figure for imports individually valued at more than $250.
   (c) There is also shown for each subgroup the number of items in the sample on which the estimate of the low-value imports was based. Use of this number to evaluate the accuracy of the estimate is explained in section H below.
2. The country, country by commodity group, and country by commodity subgroup figures in the main part of the report.
   (a) Country totals. The country totals consist of fully compiled information for imports valued at more than $250 plus an estimate of the imports valued $250 or less. The estimated amount included for shipments of $250 or less is shown for each country under arbitrary subgroup 94 appearing at the end of all of the commodity subgroups for that country. The difference between the country total and this estimated amount is the fully compiled total of imports from the country individually valued at more than $250. The country total has been increased by the inclusion of informal entries effective in January. (See section F below.) In addition, the accuracy of the country total may be affected by the estimating procedure for the shipments of $250 or less. (See section H below.)
   (b) Country by subgroup totals. The country by subgroup figures do not include any information on imports valued $250 or less except that, as described in (a) above, the estimate of the low-value imports for the country is shown under arbitrary subgroup 94.

[1]The terminology used in this statement, and in later references to "imports valued $250 or less covered by formal entries" is not strictly accurate, but has been adopted for convenience. Full compilation procedures are being continued for warehouse withdrawals, regardless of value.

Therefore, except for subgroup 94, the country by subgroup totals represent fully compiled figures for imports individually valued at more than $250. The coverage has been decreased by the exclusion of the $100 to $250 formal entry imports which were formerly included. (See sectiona G and I below.) For subgroup 94, the number of shipments in the sample upon which the estimate was based is shown at the right of the subgroup description. In order that the estimated dataand the sample information may be readily identified, a double asterisk (**) appears at the right of the figure forthe number in sample, immediately preceding the estimated value figure for subgroup 94. Use of the number in sample for subgroup 94 to evaluate the accuracy of the estimate and of the country total which includes it is explained in section H below. As in the past, country by subgroup items of less than $10,000 are combined on a commodity group basis. They are shown as "Subgroups valued under $10,000." However, in order that users may always be informed of the estimated amount for imports under $250 for a particular country, arbitrary subgroup 94 is always shown separately even if its value is less than $10,000. Therefore, if no item labeled subgroup 94 appears for a country, the user will know that no imports of $250 or less from that country appeared in the sample and no estimate for shipments of $250 or less is included in the country total.

(c) Country by group totals. The country by group totals other than for group 9 do not include any information on imports valued $250 or less. Coverage has been decreased by the exclusion of the $100 to $250 formal entry imports formerly included. The total for group 9 for the country includes the entire amount of the estimate of imports $250 or less for the country. This inclusion in group 9 is purely arbitrary, since the estimate covers all commodity groups for the country. See section H below in connection with evaluating the accuracy of the estimate.

F. The Effect of the Incluaion of Informal Entries in the Country Totala and Subgroup Totals Shown in this Report.

The import total has been increased by approximately $4 million because of the inclusion of informal entries. Some indication of the distribution of this increase by country may be available from tabulations prepared by the Bureau of the Census on the basis of the sample estimates. Users interested in this information for particular countries may make inquiry of the Bureau aa to the information available. An indication of the distribution by subgroup, on the basis of a sample month, may be obtained from the article beginning on page 7 of the February 1954 *Notes*.

G. The Extent of Undercounting in Country by Subgroup and Country by Group Figurea.

Only very rough measures can be given of the extent of undercounting which exists in the figurea where the imports $250 or less are excluded.

1. The estimated total for imports individually valued $250 or less is $8 million per month ($4 million on informal and $4 million on formal entries). This represents about 1 percent of the total value of all imports. While the omiasion of the low-value shipments from the detailed statistics cannot, therefore have an important effect on the figures taken as a whole, it is possible that a high percentage of undercounting in individual detailed figures may result.
2. The estimate of the total imports valued $250 or less from the country is given in this report (arbitrary subgroup 94) and also the estimate of the low-value shipments for each subgroup (in the subgroup summary table). These figures may assist the user in estimating the degree of undercounting in the detailed figures from which the estimates are excluded. With allowances for sampling variability in the estimates (see section H below), the undercounting in a particular country by subgroup total would not be expected to be greater than the total amount of the low-value estimate for the country or than the total amount of the low-value estimate for the subgroup, whichever is less. In addition, the user's own knowledge of the usual pattern of shipments may enable him to make a rough approximation of the probabilities as to the distribution of the estimated total among the detailed items in the report.
3. Some indication of the undercounting on a 4-digit Schedule A commodity basis, without regard to country, is provided in the February 1954 *Notes*, in the form of data for a sample month.

H. The Accuracy of the Sample Estimates.

When atatistics are estimated on the basis of a sample, exact agreement with the results that would have been obtained from a complete tabulation is not expected. The extent to which the estimated country totals and subgroup totals in this report for imports valued at $250 or less might not agree with a complete tabulation depends on the number of low-value shipments which fall in the sample. For each estimated figure in the report, the number in the aample on which the estimate was based is given.

As an example of the use of the table below, suppose an estimated value of $66,750 is based on 55 shipments in the sample. Referring to the line "50 - 64" one notes the values $14,200 and $16,000. Thia means that the chances are better than two out of three that a complete tabulation would have resulted in a figure between $52,550 ($66,750 reduced by $14,200) and $82,750 ($66,750 increased by $16,000). Similarly, a figure of $12,836,891 which represents a total of $12,770,141 for the fully compiled data for shipments valued at over $250 plus an estimated value of $66,750 based on 55 shipments in the sample would be between $12,822,691 ($12,836,891 reduced by $14,200) and $12,852,891 ($12,836,891 increased by $16,000).

In the event a user desires to combine two or more figures which are estimated values, or which include eatimated values, the variability of the combined total can be determined by merely adding the sample size for each estimated value and then referring to the line on the reliability table applicable to the combined sample size.

The omission of (1) subgroup 94 for any country or (2) a figure in the $250 and under shipments included in

THE TABLE BELOW INDICATES THE DEGREE OF RELIABILITY TO BE ATTACHED TO A SPECIFIED VALUE:

If the number of shipments valued at $250 or less included in the sample, as indicated by the sample card count, is	Then the chances are better than 2 out of 3 that a complete tabulation would have resulted in a value figure between	
	The specified estimate reduced by [1]	And the specified estimated increased by
0	0	[2]$2,200
1	$1,600	4,400
2	2,500	5,100
3	3,200	5,600
4	3,700	6,100
5	4,200	6,500
6	4,600	6,900
7 or 8	5,400	7,600
9 or 10	8,000	8,100
11 - 14	6,800	8,800
15 - 19	7,600	9,600
20 - 29	9,100	10,900
30 - 39	10,800	12,600
40 - 49	12,400	14,200
50 - 64	14,200	18,000
65 - 79	18,000	17,800
80 - 99	17,900	19,700
100 - 124	20,300	22,100
125 - 149	22,500	24,200
150 - 174	24,700	25,800
175 - 199	26,200	28,000
200 - 249	29,000	30,800
250 - 299	32,000	33,800
300 - 399	37,000	39,000
400 - 499 [3]	41,900	43,600

[1] The minimum value for imports $1 to $250 is 1/20 of the estimated amount shown in the report. If the reduction of a particular low-value estimate by the amount shown in this column results in a figure which is less than 1/20 of the estimate, then for that figure this table overstates the amount by which complete tabulation could have reduced the value. The minimum value for any subgroup or country total is the fully compiled figure for imports $250 or more plus 1/20 of the estimated amount shown for $1 to $250 imports. (The fully compiled country total for imports $250 or more can be derived by subtracting from the country total the value shown for subgroup 94, "1 TO 250 DOLLARS EST," for that country.)

[2] Where commodities normally are not imported, an indication of zero shipments in the sample is, of course, probably not underestimated to this extent, if at all.

[3] If the number of shipments in the sample of $250 or less is greater than 499, then (a) the sampling variability for the estimates of the low-value shipments will generally be less than 7 percent; and (b) the sampling variability for the total of the fully compiled over $250 shipments and the estimated amounts for shipments valued $250 or less, combined, will generally be less than 1 percent.

the total" columns of the subgroup summary table on page 8 indicates that there were no imports valued at $250 or less appearing in the 5 percent sample for the country or subgroup and does not necesaarily mean that low-value imports were not made. Similarly, the omission of a country name means that there were no imports valued at over $250 reported on formal consumption entries or any warehouse withdrawals for consumption and no imports valued at $250 or less appearing in the 5 percent sample.

I. Effect of Changes in Coverage on Comparability with Data for Periods Prior to January 1954

When using January 1954 or subsequent months' figures for purposes of comparison with figures for periods prior to January 1954, account must be taken of the coverage which was in effect for the earlier month, as well as the coverage effective January 1954. An article beginning on page 108 of the September 1953 *Notes* describes the coverage in effect for different periods of 1953. Coverage statements and explanations of any sampling procedures used are also included in the issues of Report No. FT 120 for the individual months of 1953. Since no information on imports covered by informal entries was included in any of the figures prior to January 1954, the country totals and subgroup totals (in the subgroup summary table) for January 1954 and subsequent months which include information on informal entries are not comparable in this respect to prior months. The country by subgroup and country by group figures (except group 9, as explained in section E, paragraph 2(c) above) in reports for January 1954 and subsequent months are comparable to months prior to January 1954 in the handling of information on informal entries, since no informal entry information is included in these detailed figures during either period. However, during the period July through December 1953, information on formal entries valued under $100 was excluded from the country by subgroup and country by group totals, and this would affect the comparability of the figures with those for other periods.

GENERAL EXPLANATION

COVERAGE

The import statistics include government as well as nongovernment shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from its territories and possessions and shipments between the territories and possessions are not reported as United States imports, but imports into Alaska, Hawaii, and Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of merchandise which moves into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value such as gifts valued at less than $100.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouse), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival, plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse, immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes. Information on merchandise withdrawn from bonded storage warehouses for exportation (not included in either imports for consumption or general imports) is also availabe for reference purposes.

Trade between the United States and its territories and possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of intransit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report, is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

VALUATION

The values are in general based on market or selling price, and are in general f.o.b. the exporting country. (Transportation costs to the United States may inadvertently be included in the case of merchandise which is not subject to an import duty based on value.) United States import duties are excluded.

COUNTRY OF ORIGIN

The country of origin is defined as the country where the merchandise was grown, mined or manufactured. In the event the importer can not readily obtain information as to the country of origin for a shipment, it is credited, for statistical purposes, to the country of shipment. Countries are reported as defined in Schedule C, *Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics*. Schedule C shows the descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of each country for statistical purposes. It is published as a part of Schedule A (see "Commodity Subgroup Information," below). A separate edition is also available free upon request to the Bureau of the Census. In this report countries are listed according to continents, in sequence within each continent from north to south and west to east, in accordance with their arrangement in Schedule C. The Table of Contents on page 7, which lists the countries in this order, will assist in locating the data for individual countries. The omission of a country name from this report indicates no imports from that country.

COMMODITY SUBGROUP INFORMATION

For presentation in this report, the commodity information compiled in terms of the classifications established in Schedule A, *Statistical Classification of Commodities Imported into the United States*, is summarized into approximately a hundred subgroups of related commodities. It is presented in the order in which the subgroup classifications are numbered in Schedule A. Reference to the table on page 8 will show the subgroup numbers, their unabbreviated descriptions, and the range of numbers of the individual Schedule A classifications included in each. For precise information as to the commodity content of individual subgroups, reference should be made to the descriptions in Schedule A of the numbered classifications included.

To save printing cost, complete country by subgroup information is not shown in this report. For each country, separate information is shown only for those subgroups whose individual totals for that country during the period covered by the report were $10,000 or more. Imports from each country of commodities falling in subgroups with individual totals of less than $10,000 for that country are presented as a combined total for each commodity group. Individual subgroup information for imports reported in these combined totals will be supplied upon request. A charge may be made to cover the cost of preparing this detailed information. The omission of a numbered subgroup under any country indicates no imports from that country, or imports less than $10,000.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report for earlier months of the current and previous year are shown at the back of the current month's report. With the exception of very important changes, any revisions to data for earlier years are held for reflection in the figures to be published in *Foreign Commerce and Navigation of the United States* for that year.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of *Foreign Commerce and Navigation of the United States*. Regular subscribers to FT reports are automatically supplied with copies of *Foreign Trade Statistics Notes*, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.). A catalog of *United States Foreign Trade Statistical Publications* is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports on a cost basis can also be arranged for to obtain additional detail compiled but not published. For free copies of the "Explanation of Statistics" or the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

**Import data on line labeled "1 TO 250 DOLLARS EST" are estimates based on 5% sample of informal entry and formal entry shipments valued $1-250. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample (shown immediately to the left of the double asterisk (**)) to determine the reliability of the sample, see page 5.

**Import data on line labeled "1 TO 250 DOLLARS EST" are estimates based on 5% sample of informal entry and formal entry shipments valued $1-250. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "1 TO 250 DOLLARS EST" are estimates based on 5% sample of informal entry and formal entry shipments valued $1-250. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk ("")] to determine the reliability of the sample, see page 8.

**Import data on line labeled "1 TO 250 DOLLARS EST" are estimates based on 5% sample of informal entry and formal entry shipments valued $1-250. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk ("")] to determine the reliability of the sample, see page 5.

**Import data on line labeled "1 TO 250 DOLLARS EST" are estimates based on 5% sample of informal entry and formal entry shipments valued $1-250. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

REPORT NO. FT 120

EXPLANATION OF CHANGES IN COVERAGE AND OF THE SAMPLING PROCEDURE FOR ESTIMATING IMPORTS IN SHIPMENTS INDIVIDUALLY VALUED $250 OR LESS

A. Increase in Coverage of Import Totals by Inclusion of Informal Entries.

Effective January 1954, the coverage of the United States import statistics has been broadened to include, on a sample basis, imports individually valued $250 or less reported on *informal* entries, which total approximately $4 million per month. Imports on informal entries have not been included in the import statistics prior to January 1954. As explained below, they are being included, effective with January 1954, in the over-all and summary totals only, and are *not* included in the statistics compiled for the individual Schedule A commodity classifications.

B. Decrease in Coverage in Detailed Import Statistics.

Also effective with the January 1954 statistics, information on immediate consumption imports individually valued $250 or less reported on *formal* entries totaling approximately $4 million per month, is no longer included in the statistics for the individual Schedule A commodity classifications[1]. Like the imports valued $250 or less on *informal* entries, they are being included in the statistics on a sample basis, in the over-all and summary totals only. Thus the low-value imports which, according to sample studies made, have generally similar commodity distribution whether covered by formal or informal entries, are treated uniformly in the statistics.

C. Reasons for Changes and Explanation as to Methods Adopted.

The February 1954 issue of *Foreign Trade Statistics Notes* contains an explanation regarding the increase in the value limit from $100 to $250 for informal entries, effective September 1953, under the Customs Simplification Act; the consequent need for including information on imports covered by informal entries in the statistics; and the reasons why the changes described above were made as a result of this need.

D. The Estimating Procedures.

For imports individually valued $250 or less for both formal and informal entries, a 5 percent sample is taken, data are compiled from the sample and multiplied by 20 to obtain the estimates included in the statistics. These estimates are included only in the following summary totals:

1. The over-all import total (shown at the end of this report, labeled Grand Total).
2. The country totals (shown in this report).
3. The Customs District totals (not shown in this report, but published in FT 970).
4. The economic class totals (not shown in this report, but published in FT 930 and the *Quarterly Summary*).
5. The commodity subgroup and commodity group totals (included in summary table at the beginning of this report).

Information on imports individually valued $250 or less is excluded, as mentioned above, from the statistics for individual Schedule A commodity classifications, and from all statistics for cross-classifications such as commodity by country, country by subgroup, etc.

E. Summary of Effects on Report No. FT 120 of the Changes in Coverage and the Estimating Procedure.

As a result of the changes described above, the data in report No. FT 120 effective January 1954 are affected as follows:

1. The subgroup summary table shown on page 8.
   (a) The total value shown for each subgroup includes the estimate, if any, of the imports valued $250 or less for the subgroup, as well as the compiled total for imports valued at more than $250. The accuracy of the subgroup total may be affected by the estimating procedure (see section H below). In addition, the comparability of the subgroup total with the corresponding total for months prior to January 1954 may be affected by the inclusion of informal entries effective in January 1954. (See section F below.)
   (b) In addition to the subgroup total, there is shown for each subgroup the estimated amount for imports individually valued $250 or less, if any, which has been included in the subgroup total. The difference between this estimated amount and the subgroup total is, of course, the fully compiled figure for imports individually valued at more than $250.
   (c) There is also shown for each subgroup the number of items in the sample on which the estimate of the low-value imports was based. Use of this number to evaluate the accuracy of the estimate is explained in section H below.
2. The country, country by commodity group, and country by commodity subgroup figures in the main part of the report.
   (a) Country totals. The country totals consist of fully compiled information for imports valued at more than $250 plus an estimate of the imports valued $250 or less. The estimated amount included for shipments of $250 or less is shown for each country under arbitrary subgroup 94 appearing at the end of all of the commodity subgroups for that country. The difference between the country total and this estimated amount is the fully compiled total of imports from the country individually valued at more than $250. The country total has been increased by the inclusion of informal entries effective in January. (See section F below.) In addition, the accuracy of the country total may be affected by the estimating procedure for the shipments of $250 or less. (See section H below.)
   (b) Country by subgroup totals. The country by subgroup figures do not include any information on imports valued $250 or less except that, as described in (a) above, the estimate of the low-value imports for the country is shown under arbitrary subgroup 94.

[1]The terminology used in this statement, and in later references to "imports valued $250 or less covered by formal entries" is not strictly accurate, but has been adopted for convenience. Full compilation procedures are being continued for warehouse withdrawals, regardless of value.

Therefore, except for subgroup 94, the country by subgroup totals represent fully compiled figures for imports individually valued at more than $250. The coverage has been decreased by the exclusion of the $100 to $250 formal entry imports which were formerly included. (See sections G and I below.) For subgroup 94, the number of shipments in the sample upon which the estimate was based is shown at the right of the subgroup description. In order that the estimated data and the sample information may be readily identified, a double asterisk (**) appears at the right of the figure for the number in sample, immediately preceding the estimated value figure for subgroup 94. Use of the number in sample for subgroup 94 to evaluate the accuracy of the estimate and of the country total which includes it is explained in section H below. As in the past, country by subgroup items of less than $10,000 are combined on a commodity group basis. They are shown as "Subgroups valued under $10,000." However, in order that users may always be informed of the estimated amount for imports under $250 for a particular country, arbitrary subgroup 94 is always shown separately even if its value is less than $10,000. Therefore, if no item labeled subgroup 94 appears for a country, the user will know that no imports of $250 or less from that country appeared in the sample and no estimate for shipments of $250 or less is included in the country total.

(c) Country by group totals. The country by group totals other than for group 9 do not include any information on imports valued $250 or less. Coverage has been decreased by the exclusion of the $100 to $250 formal entry imports formerly included. The total for group 9 for the country includes the entire amount of the estimate of imports $250 or less for the country. This inclusion in group 9 is purely arbitrary, since the estimate covers all commodity groups for the country. See section H below in connection with evaluating the accuracy of the estimate.

F. The Effect of the Inclusion of Informal Entries in the Country Totals and Subgroup Totals Shown in this Report.

The import total has been increased by approximately $4 million because of the inclusion of informal entries. Some indication of the distribution of this increase by country may be available from tabulations prepared by the Bureau of the Census on the basis of the sample estimates. Users interested in this information for particular countries may make inquiry of the Bureau as to the information available. An indication of the distribution by subgroup, on the basis of a sample month, may be obtained from the article beginning on page 7 of the February 1954 *Notes*.

G. The Extent of Undercounting in Country by Subgroup and Country by Group Figures.

Only very rough measures can be given of the extent of undercounting which exists in the figures where the imports $250 or less are excluded.

1. The estimated total for imports individually valued $250 or less is $8 million per month ($4 million on informal and $4 million on formal entries). This represents about 1 percent of the total value of all imports. While the omission of the low-value shipments from the detailed statistics cannot, therefore have an important effect on the figures taken as a whole, it is possible that a high percentage of undercounting in individual detailed figures may result.
2. The estimate of the total imports valued $250 or less from the country is given in this report (arbitrary subgroup 94) and also the estimate of the low-value shipments for each subgroup (in the subgroup summary table). These figures may assist the user in estimating the degree of undercounting in the detailed figures from which the estimates are excluded. With allowances for sampling variability in the estimates (see section H below), the undercounting in a particular country by subgroup total would not be expected to be greater than the total amount of the low-value estimate for the country or than the total amount of the low-value estimate for the subgroup, whichever is less. In addition, the user's own knowledge of the usual pattern of shipments may enable him to make a rough approximation of the probabilities as to the distribution of the estimated total among the detailed items in the report.
3. Some indication of the undercounting on a 4-digit Schedule A commodity basis, without regard to country, is provided in the February 1954 *Notes*, in the form of data for a sample month.

H. The Accuracy of the Sample Estimates.

When statistics are estimated on the basis of a sample, exact agreement with the results that would have been obtained from a complete tabulation is not expected. The extent to which the estimated country totals and subgroup totals in this report for imports valued at $250 or less might not agree with a complete tabulation depends on the number of low-value shipments which fall in the sample. For each estimated figure in the report, the number in the sample on which the estimate was based is given.

As an example of the use of the table below, suppose an estimated value of $66,750 is based on 55 shipments in the sample. Referring to the line "50 - 64" one notes the values $14,200 and $16,000. This means that the chances are better than two out of three that a complete tabulation would have resulted in a figure between $52,550 ($66,750 reduced by $14,200) and $82,750 ($66,750 increased by $16,000). Similarly, a figure of $12,836,891 which represents a total of $12,770,141 for the fully compiled data for shipments valued at over $250 plus an estimated value of $66,750 based on 55 shipments in the sample would be between $12,822,691 ($12,836,891 reduced by $14,200) and $12,852,391 ($12,836,891 increased by $16,000).

In the event a user desires to combine two or more figures which are estimated values, or which include estimated values, the variability of the combined total can be determined by merely adding the sample size for each estimated value and then referring to the line on the reliability table applicable to the combined sample size.

The omission of (1) subgroup 94 for any country or (2) a figure in the $250 and under shipments included in

THE TABLE BELOW INDICATES THE DEGREE OF RELIABILITY TO BE ATTACHED TO A SPECIFIED VALUE:

If the number of shipments valued at $250 or less included in the sample, as indicated by the sample card count, is	Then the chances are better than 2 out of 3 that a complete tabulation whould have resulted in a value figure between	
	The specified estimate reduced by[1]	And the specified estimated increased by
0	0	[2]$2,200
1	$1,600	4,400
2	2,500	5,100
3	3,200	5,600
4	3,700	6,100
5	4,200	6,500
6	4,600	6,900
7 or 8	5,400	7,600
9 or 10	6,000	8,100
11 - 14	6,800	8,900
15 - 19	7,600	9,800
20 - 29	9,100	10,900
30 - 39	10,800	12,600
40 - 49	12,400	14,200
50 - 64	14,200	16,000
65 - 79	16,000	17,800
80 - 99	17,900	19,700
100 - 124	20,300	22,100
125 - 149	22,500	24,200
150 - 174	24,700	25,900
175 - 199	26,200	28,000
200 - 249	29,000	30,800
250 - 299	32,000	33,800
300 - 399	37,000	39,000
400 - 499[3]	41,900	43,600

[1] The minimum value for imports $1 to $250 is 1/20 of the estimated amount shown in the report. If the reduction of a particular low-value estimate by the amount shown in this column results in a figure which is less than 1/20 of the estimate, then for that figure this table overstates the amount by which complete tabulation could have reduced the value. The minimum value for any subgroup or country total is the fully compiled figure for imports $250 or more plus 1/20 of the estimated amount shown for $1 to $250 imports. (The fully compiled country total for imports $250 or more can be derived by subtracting from the country total the value shown for subgroup 94, "1 TO 250 DOLLARS EST," for that country.)

[2] Where commodities normally are not imported, an indication of zero shipments in the sample is, of course, probably not underestimated to this extent, if at all.

[3] If the number of shipments in the sample of $250 or less is greater than 499, then (a) the sampling variability for the estimates of the low-value shipments will generally be less than 7 percent; and (b) the sampling variability for the total of the fully compiled over $250 shipments and the estimated amounts for shipments valued $250 or less, combined, will generally be less than 1 percent.

the total" columns of the subgroup summary table on page 8 indicates that there were no imports valued at $250 or less appearing in the 5 percent sample for the country or subgroup and does not necessarily mean that low-value imports were not made. Similarly, the omission of a country name means that there were no imports valued at over $250 reported on formal consumption entries or any warehouse withdrawals for consumption and no imports valued at $250 or less appearing in the 5 percent sample.

I. Effect of Changes in Coverage on Comparability with Data for Periods Prior to January 1954

When using January 1954 or subsequent months' figures for purposes of comparison with figures for periods prior to January 1954, account must be taken of the coverage which was in effect for the earlier month, as well as the coverage effective January 1954. An article beginning on page 108 of the September 1953 *Notes* describes the coverage in effect for different periods of 1953. Coverage statements and explanations of any sampling procedures used are also included in the issues of Report No. FT 120 for the individual months of 1953. Since no information on imports covered by informal entries was included in any of the figures prior to January 1954, the country totals and subgroup totals (in the subgroup summary table) for January 1954 and subsequent months which include information on informal entries are not comparable in this respect to prior months. The country by subgroup and country by group figures (except group 9, as explained in section E, paragraph 2(c) above) in reports for January 1954 and subsequent months are comparable to months prior to January 1954 in the handling of information on informal entries, since no informal entry information is included in these detailed figures during either period. However, during the period July through December 1953, information on formal entries valued under $100 was excluded from the country by subgroup and country by group totals, and this would affect the comparability of the figures with those for other periods.

GENERAL EXPLANATION

COVERAGE

The import statistics include government as well as nongovernment shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from its territories and possessions and shipments between the territories and possessions are not reported as United States imports, but imports into Alaska, Hawaii, and Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of merchandise which moves into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value such as gifts valued at less than $100.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released fromCustoms custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouse), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival, plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse, immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes. Information on merchandise withdrawn from bonded storage warehouses for exportation (not included in either imports for consumption or general imports) is also availabe for reference purposes.

Trade between the United States and its territories and possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of intransit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report, is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

VALUATION

The values are in general based on market or selling price, and are in general f.o.b. the exporting country. (Transportation costs to the United States may inadvertently be included in the case of merchandise which is not subject to an import duty based on value.) United States import duties are excluded.

COUNTRY OF ORIGIN

The country of origin is defined as the country where the merchandise was grown, mined or manufactured. In the event the importer can not readily obtain information as to the country of origin for a shipment, it is credited, for statistical purposes, to the country of shipment. Countries are reported as defined in Schedule C, *Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics*. Schedule C shows the descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of each country for statistical purposes. It is published as a part of Schedule A (see "Commodity Subgroup Information," below). A separate edition is also available free upon request to the Bureau of the Census. In this report countries are listed according to continents, in sequence within each continent from north to south and west to east, in accordance with their arrangement in Schedule C. The Table of Contents on page 7, which lists the countries in this order, will assist in locating the data for individual countries. The omission of a country name from this report indicates no imports from that country.

COMMODITY SUBGROUP INFORMATION

For presentation in this report, the commodity information compiled in terms of the classifications established in Schedule A, *Statistical Classification of Commodities Imported into the United States*, is summarized into approximately a hundred subgroups of related commodities. It is presented in the order in which the subgroup classifications are numbered in Schedule A. Reference to the table on page 8 will show the subgroup numbers, their unabbreviated descriptions, and the range of numbers of the individual Schedule A classifications included in each. For precise information as to the commodity content of individual subgroups, reference should be made to the descriptions in Schedule A of the numbered classifications included.

To save printing cost, complete country by subgroup information is not shown in this report. For each country, separate information is shown only for those subgroups whose individual totals for that country during the period covered by the report were $10,000 or more. Imports from each country of commodities falling in subgroups with individual totals of less than $10,000 for that country are presented as a combined total for each commodity group. Individual subgroup information for imports reported in these combined totals will be supplied upon request. A charge may be made to cover the cost of preparing this detailed information. The omission of a numbered subgroup under any country indicates no imports from that country, or imports less than $10,000.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report for earlier months of the current and previous year are shown at the back of the current month's report. With the exception of very important changes, any revisions to data for earlier years are held for reflection in the figures to be published in *Foreign Commerce and Navigation of the United States* for that year.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of *Foreign Commerce and Navigation of the United States*. Regular subscribers to FT reports are automatically supplied with copies of *Foreign Trade Statistics Notes*, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.). A catalog of *United States Foreign Trade Statistical Publications* is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports on a cost basis can also be arranged for to obtain additional detail compiled but not published. For free copies of the "Explanation of Statistics" or the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

*Import data on line labeled "1 TO 250 DOLLARS EST" are estimates based on 5% sample of informal entry and formal entry shipments valued $1-250. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

*Import data on line labeled "1 TO 250 DOLLARS EST" are estimates based on 5% sample of informal entry and formal entry shipments valued $1-250. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

*Import data on lines labeled "1 TO 250 DOLLARS EST" are estimates based on 5% sample of informal entry and formal entry shipments valued $1-250. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

*Import data on line labeled "1 TO 250 DOLLARS EST" are estimates based on 5% sample of informal entry and formal entry shipments valued $1-250. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk ("**")] to determine the reliability of the sample, see page 5.

REPORT NO. FT 120

EXPLANATION OF CHANGES IN COVERAGE AND OF THE SAMPLING PROCEDURE FOR ESTIMATING IMPORTS IN SHIPMENTS INDIVIDUALLY VALUED $250 OR LESS

A. Increase in Coverage of Import Totals by Inclusion of Informal Entries.

Effective January 1954, the coverage of the United States import statistics has been broadened to include, on a sample basis, imports individually valued $250 or less reported on *informal* entries, which total approximately $4 million per month. Imports on informal entries have not been included in the import statistics prior to January 1954. As explained below, they are being included, effective with January 1954, in the over-all and summary totals only, and are *not* included in the statistics compiled for the individual Schedule A commodity classifications.

B. Decrease in Coverage in Detailed Import Statistics.

Also effective with the January 1954 statistics, information on immediate consumption imports individually valued $250 or less reported on *formal* entries totaling approximately $4 million per month, is no longer included in the statistics for the individual Schedule A commodity classifications[1]. Like the imports valued $250 or less on *informal* entries, they are being included in the statistics on a sample basis, in the over-all and summary totals only. Thus the low-value imports which, according to sample studies made, have generally similar commodity distribution whether covered by formal or informal entries, are treated uniformly in the statistics.

C. Reasons for Changes and Explanation as to Methods Adopted.

The February 1954 issue of *Foreign Trade Statistics Notes* contains an explanation regarding the increase in the value limit from $100 to $250 for informal entries, effective September 1953, under the Customs Simplification Act; the consequent need for including information on imports covered by informal entries in the statistics; and the reasons why the changes described above were made as a result of this need.

D. The Estimating Procedures.

For imports individually valued $250 or less for both formal and informal entries, a 5 percent sample is taken, data are compiled from the sample and multiplied by 20 to obtain the estimates included in the statistics. These estimates are included only in the following summary totals:

1. The over-all import total (shown at the end of this report, labeled Grand Total).
2. The country totals (shown in this report).
3. The Customs District totals (not shown in this report, but published in FT 970).
4. The economic class totals (not shown in this report, but published in FT 930 and the *Quarterly Summary*).
5. The commodity subgroup and commodity group totals (included in summary table at the beginning of this report).

Information on imports individually valued $250 or less is excluded, as mentioned above, from the statistics for individual Schedule A commodity classifications, and from all statistics for cross-classifications such as commodity by country, country by subgroup, etc.

E. Summary of Effects on Report No. FT 120 of the Changes in Coverage and the Estimating Procedure.

As a result of the changes described above, the data in report No. FT 120 effective January 1954 are affected as follows:

1. The subgroup summary table shown on page 8.
   (a) The total value shown for each subgroup includes the estimate, if any, of the imports valued $250 or less for the subgroup, as well as the compiled total for imports valued at more than $250. The accuracy of the subgroup total may be affected by the estimating procedure (see section H below). In addition, the comparability of the subgroup total with the corresponding total for months prior to January 1954 may be affected by the inclusion of informal entries effective in January 1954. (See section F below.)
   (b) In addition to the subgroup total, there is shown for each subgroup the estimated amount for imports individually valued $250 or less, if any, which has been included in the subgroup total. The difference between this estimated amount and the subgroup total is, of course, the fully compiled figure for imports individually valued at more than $250.
   (c) There is also shown for each subgroup the number of items in the sample on which the estimate of the low-value imports was based. Use of this number to evaluate the accuracy of the estimate is explained in section H below.
2. The country, country by commodity group, and country by commodity subgroup figures in the main part of the report.
   (a) Country totals. The country totals consist of fully compiled information for imports valued at more than $250 plus an estimate of the imports valued $250 or less. The estimated amount included for shipments of $250 or less is shown for each country under arbitrary subgroup 94 appearing at the end of all of the commodity subgroups for that country. The difference between the country total and this estimated amount is the fully compiled total of imports from the country individually valued at more than $250. The country total has been increased by the inclusion of informal entries effective in January. (See section F below.) In addition, the accuracy of the country total may be affected by the estimating procedure for the shipments of $250 or less. (See section H below.)
   (b) Country by subgroup totals. The country by subgroup figures do not include any information on imports valued $250 or less except that, as described in (a) above, the estimate of the low-value imports for the country is shown under arbitrary subgroup 94.

[1]The terminology used in this statement, and in later references to "imports valued $250 or less covered by formal entries" is not strictly accurate, but has been adopted for convenience. Full compilation procedures are being continued for warehouse withdrawals, regardless of value.

Therefore, except for subgroup 94, the country by subgroup totals represent fully compiled figures for imports individually valued at more than $250. The coverage has been decreased by the exclusion of the $100 to $250 formal entry imports which were formerly included. (See sections G and I below.) For subgroup 94, the number of shipments in the sample upon which the estimate was based is shown at the right of the subgroup description. In order that the estimated data and the sample information may be readily identified, a double asterisk (**) appears at the right of the figure for the number in sample, immediately preceding the estimated value figure for subgroup 94. Use of the number in sample for subgroup 94 to evaluate the accuracy of the estimate and of the country total which includes it is explained in section H below. As in the past, country by subgroup items of less than $10,000 are combined on a commodity group basis. They are shown as "Subgroups valued under $10,000." However, in order that users may always be informed of the estimated amount for imports under $250 for a particular country, arbitrary subgroup 94 is always shown separately even if its value is less than $10,000. Therefore, if no item labeled subgroup 94 appears for a country, the user will know that no imports of $250 or less from that country appeared in the sample and no estimate for shipments of $250 or less is included in the country total.

(c) Country by group totals. The country by group totals other than for group 9 do not include any information on imports valued $250 or less. Coverage has been decreased by the exclusion of the $100 to $250 formal entry imports formerly included. The total for group 9 for the country includes the entire amount of the estimate of imports $250 or less for the country. This inclusion in group 9 is purely arbitrary, since the estimate covers all commodity groups for the country. See section H below in connection with evaluating the accuracy of the estimate.

F. The Effect of the Inclusion of Informal Entries in the Country Totals and Subgroup Totals Shown in this Report.

The import total has been increased by approximately $4 million because of the inclusion of informal entries. Some indication of the distribution of this increase by country may be available from tabulations prepared by the Bureau of the Census on the basis of the sample estimates. Users interested in this information for particular countries may make inquiry of the Bureau as to the information available. An indication of the distribution by subgroup, on the basis of a sample month, may be obtained from the article beginning on page 7 of the February 1954 *Notes*.

G. The Extent of Undercounting in Country by Subgroup and Country by Group Figures.

Only very rough measures can be given of the extent of undercounting which exists in the figures where the imports $250 or less are excluded.

1. The estimated total for imports individually valued $250 or less is $8 million per month ($4 million on informal and $4 million on formal entries). This represents about 1 percent of the total value of all imports. While the omission of the low-value shipments from the detailed statistics cannot, therefore have an important effect on the figures taken as a whole, it is possible that a high percentage of undercounting in individual detailed figures may result.
2. The estimate of the total imports valued $250 or less from the country is given in this report (arbitrary subgroup 94) and also the estimate of the low-value shipments for each subgroup (in the subgroup summary table). These figures may assist the user in estimating the degree of undercounting in the detailed figures from which the estimates are excluded. With allowances for sampling variability in the estimates (see section H below), the undercounting in a particular country by subgroup total would not be expected to be greater than the total amount of the low-value estimate for the country or than the total amount of the low-value estimate for the subgroup, whichever is less. In addition, the user's own knowledge of the usual pattern of shipments may enable him to make a rough approximation of the probabilities as to the distribution of the estimated total among the detailed items in the report.
3. Some indication of the undercounting on a 4-digit Schedule A commodity basis, without regard to country, is provided in the February 1954 *Notes*, in the form of data for a sample month.

H. The Accuracy of the Sample Estimates.

When statistics are estimated on the basis of a sample, exact agreement with the results that would have been obtained from a complete tabulation is not expected. The extent to which the estimated country totals and subgroup totals in this report for imports valued at $250 or less might not agree with a complete tabulation depends on the number of low-value shipments which fall in the sample. For each estimated figure in the report, the number in the sample on which the estimate was based is given.

As an example of the use of the table below, suppose an estimated value of $66,750 is based on 55 shipments in the sample. Referring to the line "50 - 64" one notes the values $14;200 and $16,000. This means that the chances are better than two out of three that a complete tabulation would have resulted in a figure between $52,550 ($66,750 reduced by $14,200) and $82,750 ($66,750 increased by $16,000). Similarly, a figure of $12,836,891 which represents a total of $12,770,141 for the fully compiled data for shipments valued at over $250 plus an estimated value of $66,750 based on 55 shipments in the sample would be between $12,822,691 ($12,836,891 reduced by $14,200) and $12,852,891 ($12,836,891 increased by $16,000).

In the event a user desires to combine two or more figures which are estimated values, or which include estimated values, the variability of the combined total can be determined by merely adding the sample size for each estimated value and then referring to the line on the reliability table applicable to the combined sample size.

The omission of (1) subgroup 94 for any country or (2) a figure in the $250 and under shipments included in

THE TABLE BELOW INDICATES THE DEGREE OF RELIABILITY TO BE ATTACHED TO A SPECIFIED VALUE:

If the number of shipments valued at $250 or less included in the sample, as indicated by the sample card count, is	Then the chances are better than 2 out of 3 that a complete tabulation would have resulted in a value figure between	
	The specified estimate reduced by[1]	And the specified estimated increased by
0	0	[2]$2,200
1	$1,600	4,400
2	2,500	5,100
3	3,200	5,600
4	3,700	6,100
5	4,200	6,500
6	4,600	6,900
7 or 8	5,400	7,600
9 or 10	6,000	8,100
11 - 14	6,800	8,900
15 - 19	7,600	9,600
20 - 29	9,100	10,900
30 - 39	10,800	12,600
40 - 49	12,400	14,200
50 - 64	14,200	16,000
65 - 79	16,000	17,800
80 - 99	17,900	19,700
100 - 124	20,300	22,100
125 - 149	22,500	24,200
150 - 174	24,700	25,800
175 - 199	26,200	28,000
200 - 249	29,000	30,800
250 - 299	32,000	33,800
300 - 399	37,000	39,000
400 - 499[3]	41,900	43,600

[1] The minimum value for imports $1 to $250 is 1/20 of the estimated amount shown in the report. If the reduction of a particular low-value estimate by the amount shown in this column results in a figure which is less than 1/20 of the estimate, then for that figure this table overstates the amount by which complete tabulation could have reduced the value. The minimum value for any subgroup or country total is the fully compiled figure for imports $250 or more plus 1/20 of the estimated amount shown for $1 to $250 imports. (The fully compiled country total for imports $250 or more can be derived by subtracting from the country total the value shown for subgroup 94, "1 TO 250 DOLLARS EST," for that country.)

[2] Where commodities normally are not imported, an indication of zero shipments in the sample is, of course, probably not underestimated to this extent, if at all.

[3] If the number of shipments in the sample of $250 or less is greater than 499, then (a) the sampling variability for the estimates of the low-value shipments will generally be less than 7 percent; and (b) the sampling variability for the total of the fully compiled over $250 shipments and the estimated amounts for shipments valued $250 or less, combined, will generally be less than 1 percent.

the total" columns of the subgroup summary table on page 8 indicates that there were no imports valued at $250 or less appearing in the 5 percent sample for the country or subgroup and does not necessarily mean that low-value imports were not made. Similarly, the omission of a country name means that there were no imports valued at over $250 reported on formal consumption entries or any warehouse withdrawals for consumption and no imports valued at $250 or less appearing in the 5 percent sample.

I. Effect of Changes in Coverage on Comparability with Data for Periods Prior to January 1954

When using January 1954 or subsequent months' figures for purposes of comparison with figures for periods prior to January 1954, account must be taken of the coverage which was in effect for the earlier month, as well as the coverage effective January 1954. An article beginning on page 108 of the September 1953 *Notes* describes the coverage in effect for different periods of 1953. Coverage statements and explanations of any sampling procedures used are also included in the issues of Report No. FT 120 for the individual months of 1953. Since no information on imports covered by informal entries was included in any of the figures prior to January 1954, the country totals and subgroup totals (in the subgroup summary table) for January 1954 and subsequent months which include information on informal entries are not comparable in this respect to prior months. The country by subgroup and country by group figures (except group 9, as explained in section E, paragraph 2(c) above) in reports for January 1954 and subsequent months are comparable to months prior to January 1954 in the handling of information on informal entries, since no informal entry information is included in these detailed figures during either period. However, during the period July through December 1953, information on formal entries valued under $100 was excluded from the country by subgroup and country by group totals, and this would affect the comparability of the figures with those for other periods.

GENERAL EXPLANATION

COVERAGE

The import statistics include government as well as nongovernment shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from its territories and possessions and shipments between the territories and possessions are not reported as United States imports, but imports into Alaska, Hawaii, and Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of merchandise which moves into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value such as gifts valued at less than $100.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released fromCustoms custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouse), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival, plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse, immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes. Information on merchandise withdrawn from bonded storage warehouses for exportation (not included in either imports for consumption or general imports) is also availabe for reference purposes.

Trade between the United States and its territories and possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of intransit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in thia report, is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

VALUATION

The values are in general based on market or selling price, and are in general f.o.b. the exporting country. (Transportation costs to the United States may inadvertently be included in the case of merchandise which is not subject to an import duty based on value.) United States import duties are excluded.

COUNTRY OF ORIGIN

The country of origin is defined as the country where the merchandise was grown, mined or manufactured. In the event the importer can not readily obtain information as to the country of origin for a shipment, it is credited, for statistical purposes, to the country of shipment. Countries are reported as defined in Schedule C, *Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics*. Schedule C shows the descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of each country for statistical purposes. It is published as a part of Schedule A (see "Commodity Subgroup Information," below). A separate edition is also available free upon request to the Bureau of the Census. In this report countries are listed according to continents, in sequence within each continent from north to south and west to east, in accordance with their arrangement in Schedule C. The Table of Contents on page 7, which lists the countries in this order, will assist in locating the data for individual countries. The omission of a country name from this report indicates no imports from that country.

COMMODITY SUBGROUP INFORMATION

For presentation in this report, the commodity information compiled in terms of the classifications established in Schedule A, *Statistical Classification of Commodities Imported into the United States*, is summarized into approximately a hundred subgroups of related commodities. It is presented in the order in which the subgroup classifications are numbered in Schedule A. Reference to the table on page 8 will show the subgroup numbers, their unabbreviated descriptions, and the range of numbers of the individual Schedule A classifications included in each. For precise information as to the commodity content of individual subgroups, reference should be made to the descriptions in Schedule A of the numbered classifications included.

To save printing cost, complete country by subgroup information is not shown in this report. For each country, separate information is shown only for those subgroups whose individual totals for that country during the period covered by the report were $10,000 or more. Imports from each country of commodities falling in subgroups with individual totals of less than $10,000 for that country are presented as a combined total for each commodity group. Individual subgroup information for imports reported in these combined totals will be supplied upon request. A charge may be made to cover the cost of preparing this detailed information. The omission of a numbered subgroup under any country indicates no imports from that country, or imports less than $10,000.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report for earlier months of the current and previous year are shown at the back of the current month's report. With the exception of very important changes, any revisions to data for earlier years are held for reflection in the figures to be published in *Foreign Commerce and Navigation of the United States* for that year.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of *Foreign Commerce and Navigation of the United States*. Regular subscribers to FT reports are automatically supplied with copies of *Foreign Trade Statistics Notes*, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.). A catalog of *United States Foreign Trade Statistical Publications* is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports on a cost basis can also be arranged for to obtain additional detail compiled but not published. For free copies of the "Explanation of Statistics" or the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

**Import data on line labeled "1 TO 250 DOLLARS EST" are estimates based on 5% sample of informal entry and formal entry shipments valued $1-250. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk ("")] to determine the reliability of the sample, see page 5.

**Import data on line labeled "1 TO 250 DOLLARS EST" are estimates based on 5% sample of informal entry and formal entry shipments valued $1-250. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample (shown immediately to the left of the double asterisk (**)) to determine the reliability of the sample, see page 5.

REPORT NO. FT 120

EXPLANATION OF CHANGES IN COVERAGE AND OF THE SAMPLING PROCEDURE FOR ESTIMATING IMPORTS IN SHIPMENTS INDIVIDUALLY VALUED $250 OR LESS

A. Increase in Coverage of Import Totals by Inclusion of Informal Entries.

Effective January 1954, the coverage of the United States import statistics has been broadened to include, on a sample basis, imports individually valued $250 or less reported on *informal* entries, which total approximately $4 million per month. Imports on informal entries have not been included in the import statistics prior to January 1954. As explained below, they are being included, effective with January 1954, in the over-all and summary totals only, and are *not* included in the statistics compiled for the individual Schedule A commodity classifications.

B. Decrease in Coverage in Detailed Import Statistics.

Also effective with the January 1954 statistics, information on immediate consumption imports individually valued $250 or less reported on *formal* entries totaling approximately $4 million per month, is no longer included in the statistics for the individual Schedule A commodity classifications[1]. Like the imports valued $250 or less on *informal* entries, they are being included in the statistics on a sample basis, in the over-all and summary totals only. Thus the low-value imports which, according to sample studies made, have generally similar commodity distribution whether covered by formal or informal entries, are treated uniformly in the statistics.

C. Reasons for Changes and Explanation as to Methods Adopted.

The February 1954 issue of *Foreign Trade Statistics Notes* contains an explanation regarding the increase in the value limit from $100 to $250 for informal entries, effective September 1953, under the Customs Simplification Act; the consequent need for including information on imports covered by informal entries in the statistics; and the reasons why the changes described above were made as a result of this need.

D. The Estimating Procedures.

For imports individually valued $250 or less for both formal and informal entries, a 5 percent sample is taken, data are compiled from the sample and multiplied by 20 to obtain the estimates included in the statistics. These estimates are included only in the following summary totals:

1. The over-all import total (shown at the end of this report, labeled Grand Total).
2. The country totals (shown in this report).
3. The Customs District totals (not shown in this report, but published in FT 970).
4. The economic class totals (not shown in this report, but published in FT 930 and the *Quarterly Summary*).
5. The commodity subgroup and commodity group totals (included in summary table at the beginning of this report).

Information on imports individually valued $250 or less is excluded, as mentioned above, from the statistics for individual Schedule A commodity classifications, and from all statistics for cross-classifications such as commodity by country, country by subgroup, etc.

E. Summary of Effects on Report No. FT 120 of the Changes in Coverage and the Estimating Procedure.

As a result of the changes described above, the data in report No. FT 120 effective January 1954 are affected as follows:

1. The subgroup summary table shown on page 8.
   (a) The total value shown for each subgroup includes the estimate, if any, of the imports valued $250 or less for the subgroup, as well as the compiled total for imports valued at more than $250. The accuracy of the subgroup total may be affected by the estimating procedure (see section H below). In addition, the comparability of the subgroup total with the corresponding total for months prior to January 1954 may be affected by the inclusion of informal entries effective in January 1954. (See section F below.)
   (b) In addition to the subgroup total, there is shown for each subgroup the estimated amount for imports individually valued $250 or less, if any, which has been included in the subgroup total. The difference between this estimated amount and the subgroup total is, of course, the fully compiled figure for imports individually valued at more than $250.
   (c) There is also shown for each subgroup the number of items in the sample on which the estimate of the low-value imports was based. Use of this number to evaluate the accuracy of the estimate is explained in section H below.
2. The country, country by commodity group, and country by commodity subgroup figures in the main part of the report.
   (a) Country totals. The country totals consist of fully compiled information for imports valued at more than $250 plus an estimate of the imports valued $250 or less. The estimated amount included for shipments of $250 or less is shown for each country under arbitrary subgroup 94 appearing at the end of all of the commodity subgroups for that country. The difference between the country total and this estimated amount is the fully compiled total of imports from the country individually valued at more than $250. The country total has been increased by the inclusion of informal entries effective in January. (See section F below.) In addition, the accuracy of the country total may be affected by the estimating procedure for the shipments of $250 or less. (See section H below.)
   (b) Country by subgroup totals. The country by subgroup figures do not include any information on imports valued $250 or less except that, as described in (a) above, the estimate of the low-value imports for the country is shown under arbitrary subgroup 94.

[1]The terminology used in this statement, and in later references to "imports valued $250 or less covered by formal entries" is not strictly accurate, but has been adopted for convenience. Full compilation procedures are being continued for warehouse withdrawals, regardless of value.

Therefore, except for subgroup 94, the country by subgroup totals represent fully compiled figures for imports individually valued at more than $250. The coverage has been decreased by the exclusion of the $100 to $250 formal entry imports which were formerly included. (See sections G and I below.) For subgroup 94, the number of shipments in the sample upon which the estimate was based is shown at the right of the subgroup description. In order that the estimated data and the sample information may be readily identified, a double asterisk (**) appears at the right of the figure for the number in sample, immediately preceding the estimated value figure for subgroup 94. Use of the number in sample for subgroup 94 to evaluate the accuracy of the estimate and of the country total which includes it is explained in section H below. As in the past, country by subgroup items of less than $10,000 are combined on a commodity group basis. They are shown as "Subgroups valued under $10,000." However, in order that users may always be informed of the estimated amount for imports under $250 for a particular country, arbitrary subgroup 94 is always shown separately even if its value is less than $10,000. Therefore, if no item labeled subgroup 94 appears for a country, the user will know that no imports of $250 or less from that country appeared in the sample and no estimate for shipments of $250 or less is included in the country total.

(c) Country by group totals. The country by group totals other than for group 9 do not include any information on imports valued $250 or less. Coverage has been decreased by the exclusion of the $100 to $250 formal entry imports formerly included. The total for group 9 for the country includes the entire amount of the estimate of imports $250 or less for the country. This inclusion in group 9 is purely arbitrary, since the estimate covers all commodity groups for the country. See section H below in connection with evaluating the accuracy of the estimate.

F. The Effect of the Inclusion of Informal Entries in the Country Totals and Subgroup Totals Shown in this Report.

The import total has been increased by approximately $4 million because of the inclusion of informal entries. Some indication of the distribution of this increase by country may be available from tabulations prepared by the Bureau of the Census on the basis of the sample estimates. Users interested in this information for particular countries may make inquiry of the Bureau as to the information available. An indication of the distribution by subgroup, on the basis of a sample month, may be obtained from the article beginning on page 7 of the February 1954 *Notes*.

G. The Extent of Undercounting in Country by Subgroup and Country by Group Figures.

Only very rough measures can be given of the extent of undercounting which exists in the figures where the imports $250 or less are excluded.

1. The estimated total for imports individually valued $250 or less is $8 million per month ($4 million on informal and $4 million on formal entries). This represents about 1 percent of the total value of all imports. While the omission of the low-value shipments from the detailed statistics cannot, therefore have an important effect on the figures taken as a whole, it is possible that a high percentage of undercounting in individual detailed figures may result.
2. The estimate of the total imports valued $250 or less from the country is given in this report (arbitrary subgroup 94) and also the estimate of the low-value shipments for each subgroup (in the subgroup summary table). These figures may assist the user in estimating the degree of undercounting in the detailed figures from which the estimates are excluded. With allowances for sampling variability in the estimates (see section H below), the undercounting in a particular country by subgroup total would not be expected to be greater than the total amount of the low-value estimate for the country or than the total amount of the low-value estimate for the subgroup, whichever is less. In addition, the user's own knowledge of the usual pattern of shipments may enable him to make a rough approximation of the probabilities as to the distribution of the estimated total among the detailed items in the report.
3. Some indication of the undercounting on a 4-digit Schedule A commodity basis, without regard to country, is provided in the February 1954 *Notes*, in the form of data for a sample month.

H. The Accuracy of the Sample Estimates.

When statistics are estimated on the basis of a sample, exact agreement with the results that would have been obtained from a complete tabulation is not expected. The extent to which the estimated country totals and subgroup totals in this report for imports valued at $250 or less might not agree with a complete tabulation depends on the number of low-value shipments which fall in the sample. For each estimated figure in the report, the number in the sample on which the estimate was based is given.

As an example of the use of the table below, suppose an estimated value of $66,750 is based on 55 shipments in the sample. Referring to the line "50 - 64" one notes the values $14,200 and $16,000. This means that the chances are better than two out of three that a complete tabulation would have resulted in a figure between $52,550 ($66,750 reduced by $14,200) and $82,750 ($66,750 increased by $16,000). Similarly, a figure of $12,836,891 which represents a total of $12,770,141 for the fully compiled data for shipments valued at over $250 plus an estimated value of $66,750 based on 55 shipments in the sample would be between $12,822,691 ($12,836,891 reduced by $14,200) and $12,852,891 ($12,836,891 increased by $16,000).

In the event a user desires to combine two or more figures which are estimated values, or which include estimated values, the variability of the combined total can be determined by merely adding the sample size for each estimated value and then referring to the line on the reliability table applicable to the combined sample size.

The omission of (1) subgroup 94 for any country or (2) a figure in the $250 and under shipments included in

THE TABLE BELOW INDICATES THE DEGREE OF RELIABILITY TO BE ATTACHED TO A SPECIFIED VALUE:

If the number of shipments valued at $250 or less included in the sample, as indicated by the sample card count, is	Then the chances are better than 2 out of 3 that a complete tabulation should have resulted in a value figure between	
	The specified estimate reduced by [1]	And the specified estimated increased by

40 - 49	12,400	14,200
50 - 64	14,200	16,000
65 - 79	16,000	17,800
80 - 99	17,900	19,700
100 - 124	20,300	22,100
125 - 149	22,500	24,200
150 - 174	24,700	25,800
175 - 199	26,200	28,000
200 - 249	29,000	30,800
250 - 299	32,000	33,800
300 - 399	37,000	39,000
400 - 499 [3]	41,900	43,600

[1] The minimum value for imports $1 to $250 is 1/20 of the estimated amount shown in the report. If the reduction of a particular low-value estimate by the amount shown in this column results in a figure which is less than 1/20 of the estimate, then for that figure this table overstates the amount by which complete tabulation could have reduced the value. The minimum value for any subgroup or country total is the fully compiled figure for imports $250 or more plus 1/20 of the estimated amount shown for $1 to $250 imports. (The fully compiled country total for imports $250 or more can be derived by subtracting from the country total the value shown for subgroup 94, "1 TO 250 DOLLARS EST," for that country.)

[2] Where commodities normally are not imported, an indication of zero shipments in the sample is, of course, probably not underestimated to this extent, if at all.

[3] If the number of shipments in the sample of $250 or less is greater than 499, then (a) the sampling variability for the estimates of the low-value shipments will generally be less than 7 percent; and (b) the sampling variability for the total of the fully compiled over $250 shipments and the estimated amounts for shipments valued $250 or less, combined, will generally be less than 1 percent.

the total" columns of the subgroup summary table on page 8 indicates that there were no imports valued at $250 or less appearing in the 5 percent sample for the country or subgroup and does not necessarily mean that low-value imports were not made. Similarly, the omission of a country name means that there were no imports valued at over $250 reported on formal consumption entries or any warehouse withdrawals for consumption and no imports valued at $250 or less appearing in the 5 percent sample.

I. Effect of Changes in Coverage on Comparability with Data for Periods Prior to January 1954

When using January 1954 or subsequent months' figures for purposes of comparison with figures for periods prior to January 1954, account must be taken of the coverage which was in effect for the earlier month, as well as the coverage effective January 1954. An article beginning on page 108 of the September 1953 *Notes* describes the coverage in effect for different periods of 1953. Coverage statements and explanations of any sampling procedures used are also included in the issues of Report No. FT 120 for the individual months of 1953. Since no information on imports covered by informal entries was included in any of the figures prior to January 1954, the country totals and subgroup totals (in the subgroup summary table) for January 1954 and subsequent months which include information on informal entries are not comparable in this respect to prior months. The country by subgroup and country by group figures (except group 9, as explained in section E, paragraph 2(c) above) in reports for January 1954 and subsequent months are comparable to months prior to January 1954 in the handling of information on informal entries, since no informal entry information is included in these detailed figures during either period. However, during the period July through December 1953, information on formal entries valued under $100 was excluded from the country by subgroup and country by group totals, and this would affect the comparability of the figures with those for other periods.

GENERAL EXPLANATION

COVERAGE

The import statistics include government as well as nongovernment shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from its territories and possessions and shipments between the territories and possessions are not reported as United States imports, but imports into Alaska, Hawaii, and Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of merchandise which moves into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value such as gifts valued at less than $100.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released fromCustoms custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouse), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival, plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse, immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes. Information on merchandise withdrawn from bonded storage warehouses for exportation (not included in either imports for consumption or general imports) is also availabe for reference purposes.

Trade between the United States and its territories and possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of intransit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report, is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

VALUATION

The values are in general based on market or selling price, and are in general f.o.b. the exporting country. (Transportation costs to the United States may inadvertently be included in the case of merchandise which is not subject to an import duty based on value.) United States import duties are excluded.

COUNTRY OF ORIGIN

The country of origin is defined as the country where the merchandise was grown, mined or manufactured. In the event the importer can not readily obtain information as to the country of origin for a shipment, it is credited, for statistical purposes, to the country of shipment. Countries are reported as defined in Schedule C, *Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics*. Schedule C shows the descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of each country for statistical purposes. It is published as a part of Schedule A (see "Commodity Subgroup Information," below). A separate edition is also available free upon request to the Bureau of the Census. In this report countries are listed according to continents, in sequence within each continent from north to south and west to east, in accordance with their arrangement in Schedule C. The Table of Contents on page 7, which lists the countries in this order, will assist in locating the data for individual countries. The omission of a country name from this report indicates no imports from that country.

COMMODITY SUBGROUP INFORMATION

For presentation in this report, the commodity information compiled in terms of the classifications established in Schedule A, *Statistical Classification of Commodities Imported into the United States*, is summarized into approximately a hundred subgroups of related commodities. It is presented in the order in which the subgroup classifications are numbered in Schedule A. Reference to the table on page 8 will show the subgroup numbers, their unabbreviated descriptions, and the range of numbers of the individual Schedule A classifications included in each. For precise information as to the commodity content of individual subgroups, reference should be made to the descriptions in Schedule A of the numbered classifications included.

To save printing cost, complete country by subgroup information is not shown in this report. For each country, separate information is shown only for those subgroups whose individual totals for that country during the period covered by the report were $10,000 or more. Imports from each country of commodities falling in subgroups with individual totals of less than $10,000 for that country are presented as a combined total for each commodity group. Individual subgroup information for imports reported in these combined totals will be supplied upon request. A charge may be made to cover the cost of preparing this detailed information. The omission of a numbered subgroup under any country indicates no imports from that country, or imports less than $10,000.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report for earlier months of the current and previous year are shown at the back of the current month's report. With the exception of very important changes, any revisions to data for earlier years are held for reflection in the figures to be published in *Foreign Commerce and Navigation of the United States* for that year.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of *Foreign Commerce and Navigation of the United States*. Regular subscribers to FT reports are automatically supplied with copies of *Foreign Trade Statistics Notes*, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.). A catalog of *United States Foreign Trade Statistical Publications* is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports on a cost basis can also be arranged for to obtain additional detail compiled but not published. For free copies of the "Explanation of Statistics" or the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

**Import date on line labeled "1 TO 250 DOLLARS EST" are estimates based on 5% sample of informal entry and formal entry shipments valued $1-250. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample (shown immediately to the left of the double asterisk (**)) to determine the reliability of the sample, see page 5.

**Import data on line labeled "1 TO 250 DOLLARS EST" are estimates based on 5% sample of informal entry and formal entry shipments valued $1-250. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "1 TO 250 DOLLARS EST" are estimates based on 5% sample of informal entry and formal entry shipments valued $1-250. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample (shown immediately to the left of the double asterisk ("*")) to determine the reliability of the sample, see page 5.

**Import data on line labeled "1 TO 250 DOLLARS EST" are estimates based on 5% sample of informal entry and formal entry shipments valued $1-250. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

REPORT NO. FT 120

EXPLANATION OF CHANGES IN COVERAGE AND OF THE SAMPLING PROCEDURE FOR ESTIMATING IMPORTS IN SHIPMENTS INDIVIDUALLY VALUED $250 OR LESS

A. Increase in Coverage of Import Totals by Inclusion of Informal Entries.

Effective January 1954, the coverage of the United States import statistics has been broadened to include, on a sample basis, imports individually valued $250 or less reported on *informal* entries, which total approximately $4 million per month. Imports on informal entries have not been included in the import statistics prior to January 1954. As explained below, they are being included, effective with January 1954, in the over-all and summary totals only, and are *not* included in the statistics compiled for the individual Schedule A commodity classifications.

B. Decrease in Coverage in Detailed Import Statistics.

Also effective with the January 1954 statistics, information on immediate consumption imports individually valued $250 or less reported on *formal* entries totaling approximately $4 million per month, is no longer included in the statistics for the individual Schedule A commodity classifications[1]. Like the imports valued $250 or less on *informal* entries, they are being included in the statistics on a sample basis, in the over-all and summary totals only. Thus the low-value imports which, according to sample studies made, have generally similar commodity distribution whether covered by formal or informal entries, are treated uniformly in the statistics.

C. Reasons for Changes and Explanation as to Methods Adopted.

The February 1954 issue of *Foreign Trade Statistics Notes* contains an explanation regarding the increase in the value limit from $100 to $250 for informal entries, effective September 1953, under the Customs Simplification Act; the consequent need for including information on imports covered by informal entries in the statistics; and the reasons why the changes described above were made as a result of this need.

D. The Estimating Procedures.

For imports individually valued $250 or less for both formal and informal entries, a 5 percent sample is taken, data are compiled from the sample and multiplied by 20 to obtain the estimates included in the statistics. These estimates are included only in the following summary totals:

1. The over-all import total (shown at the end of this report, labeled Grand Total).
2. The country totals (shown in this report).
3. The Customs District totals (not shown in this report, but published in FT 970).
4. The economic class totals (not shown in this report, but published in FT 930 and the *Quarterly Summary*).
5. The commodity subgroup and commodity group totals (included in summary table at the beginning of this report).

Information on imports individually valued $250 or less is excluded, as mentioned above, from the statistics for individual Schedule A commodity classifications, and from all statistics for cross-classifications such as commodity by country, country by subgroup, etc.

E. Summary of Effects on Report No. FT 120 of the Changes in Coverage and the Estimating Procedure.

As a result of the changes described above, the data in report No. FT 120 effective January 1954 are affected as follows:

1. The subgroup summary table shown on page 8.
   (a) The total value shown for each subgroup includes the estimate, if any, of the imports valued $250 or less for the subgroup, as well as the compiled total for imports valued at more than $250. The accuracy of the subgroup total may be affected by the estimating procedure (see section H below). In addition, the comparability of the subgroup total with the corresponding total for months prior to January 1954 may be affected by the inclusion of informal entries effective in January 1954. (See section F below.)
   (b) In addition to the subgroup total, there is shown for each subgroup the estimated amount for imports individually valued $250 or less, if any, which has been included in the subgroup total. The difference between this estimated amount and the subgroup total is, of course, the fully compiled figure for imports individually valued at more than $250.
   (c) There is also shown for each subgroup the number of items in the sample on which the estimate of the low-value imports was based. Use of this number to evaluate the accuracy of the estimate is explained in section H below.
2. The country, country by commodity group, and country by commodity subgroup figures in the main part of the report.
   (a) Country totals. The country totals consist of fully compiled information for imports valued at more than $250 plus an estimate of the imports valued $250 or less. The estimated amount included for shipments of $250 or less is shown for each country under arbitrary subgroup 94 appearing at the end of all of the commodity subgroups for that country. The difference between the country total and this estimated amount is the fully compiled total of imports from the country individually valued at more than $250. The country total has been increased by the inclusion of informal entries effective in January. (See section F below.) In addition, the accuracy of the country total may be affected by the estimating procedure for the shipments of $250 or less. (See section H below.)
   (b) Country by subgroup totals. The country by subgroup figures do not include any information on imports valued $250 or less except that, as described in (a) above, the estimate of the low-value imports for the country is shown under arbitrary subtroup 94.

[1]The terminology used in this statement, and in later references to "imports valued $250 or less covered by formal entries" is not strictly accurate, but has been adopted for convenience. Full compilation procedures are being continued for warehouse withdrawals, regardless of value.

Therefore, except for subgroup 94, the country by subgroup totals represent fully compiled figures for imports individually valued at more than $250. The coverage has been decreased by the exclusion of the $100 to $250 formal entry imports which were formerly included. (See sections G and I below.) For subgroup 94, the number of shipments in the sample upon which the estimate was based is shown at the right of the subgroup description. In order that the estimated data and the sample information may be readily identified, a double asterisk (**) appears at the right of the figure for the number in sample, immediately preceding the estimated value figure for subgroup 94. Use of the number in sample for subgroup 94 to evaluate the accuracy of the estimate and of the country total which includes it is explained in section H below. As in the past, country by subgroup items of less than $10,000 are combined on a commodity group basis. They are shown as "Subgroups valued under $10,000." However, in order that users may always be informed of the estimated amount for imports under $250 for a particular country, arbitrary subgroup 94 is always shown separately even if its value is less than $10,000. Therefore, if no item labeled subgroup 94 appears for a country, the user will know that no imports of $250 or less from that country appeared in the sample and no estimate for shipments of $250 or less is included in the country total.

(c) Country by group totals. The country by group totals other than for group 9 do not include any information on imports valued $250 or less. Coverage has been decreased by the exclusion of the $100 to $250 formal entry imports formerly included. The total for group 9 for the country includes the entire amount of the estimate of imports $250 or less for the country. This inclusion in group 9 is purely arbitrary, since the estimate covers all commodity groups for the country. See section H below in connection with evaluating the accuracy of the estimate.

F. The Effect of the Inclusion of Informal Entries in the Country Totals and Subgroup Totals Shown in this Report.

The import total has been increased by approximately $4 million because of the inclusion of informal entries. Some indication of the distribution of this increase by country may be available from tabulations prepared by the Bureau of the Census on the basis of the sample estimates. Users interested in this information for particular countries may make inquiry of the Bureau as to the information available. An indication of the distribution by subgroup, on the basis of a sample month, may be obtained from the article beginning on page 7 of the February 1954 *Notes*.

G. The Extent of Undercounting in Country by Subgroup and Country by Group Figures.

Only very rough measures can be given of the extent of undercounting which exists in the figures where the imports $250 or less are excluded.

1. The estimated total for imports individually valued $250 or less is $8 million per month ($4 million on informal and $4 million on formal entries). This represents about 1 percent of the total value of all imports. While the omission of the low-value shipments from the detailed statistics cannot, therefore have an important effect on the figures taken as a whole, it is possible that a high percentage of undercounting in individual detailed figures may result.
2. The estimate of the total imports valued $250 or less from the country is given in this report (arbitrary subgroup 94) and also the estimate of the low-value shipments for each subgroup (in the subgroup summary table). These figures may assist the user in estimating the degree of undercounting in the detailed figures from which the estimates are excluded. With allowances for sampling variability in the estimates (see section H below), the undercounting in a particular country by subgroup total would not be expected to be greater than the total amount of the low-value estimate for the country or than the total amount of the low-value estimate for the subgroup, whichever is less. In addition, the user's own knowledge of the usual pattern of shipments may enable him to make a rough approximation of the probabilities as to the distribution of the estimated total among the detailed items in the report.
3. Some indication of the undercounting on a 4-digit Schedule A commodity basis, without regard to country, is provided in the February 1954 *Notes*, in the form of data for a sample month.

H. The Accuracy of the Sample Estimates.

When statistics are estimated on the basis of a sample, exact agreement with the results that would have been obtained from a complete tabulation is not expected. The extent to which the estimated country totals and subgroup totals in this report for imports valued at $250 or less might not agree with a complete tabulation depends on the number of low-value shipments which fall in the sample. For each estimated figure in the report, the number in the sample on which the estimate was based is given.

As an example of the use of the table below, suppose an estimated value of $66,750 is based on 55 shipments in the sample. Referring to the line "50 - 64" one notes the values $14,200 and $16,000. This means that the chances are better than two out of three that a complete tabulation would have resulted in a figure between $52,550 ($66,750 reduced by $14,200) and $82,750 ($66,750 increased by $16,000). Similarly, a figure of $12,836,891 which represents a total of $12,770,141 for the fully compiled data for shipments valued at over $250 plus an estimated value of $66,750 based on 55 shipments in the sample would be between $12,822,691 ($12,836,891 reduced by $14,200) and $12,852,891 ($12,836,891 increased by $16,000).

In the event a user desires to combine two or more figures which are estimated values, or which include estimated values, the variability of the combined total can be determined by merely adding the sample size for each estimated value and then referring to the line on the reliability table applicable to the combined sample size.

The omission of (1) subgroup 94 for any country or (2) a figure in the $250 and under shipments included in

THE TABLE BELOW INDICATES THE DEGREE OF RELIABILITY TO BE ATTACHED TO A SPECIFIED VALUE:

If the number of shipments valued at $250 or less included in the sample, as indicated by the sample card count, is	Then the chances are better than 2 out of 3 that a complete tabulation whould have resulted in a value figure between	
	The specified estimate reduced by[1]	And the specified estimated increased by
1	0	[2]$2,200
1	$1,600	4,100
2	2,500	5,100
3	3,200	5,800
4	3,700	6,100
5	4,200	6,500
6	4,600	6,900
7 or 8	5,400	7,600
9 or 10	6,000	8,100
11 - 14	6,800	8,800
15 - 19	7,600	9,600
20 - 29	9,100	10,900
30 - 39	10,800	12,600
40 - 49	12,400	14,200
50 - 64	14,200	16,000
65 - 79	16,000	17,800
80 - 99	17,900	19,700
100 - 124	20,300	22,100
125 - 149	22,500	24,200
150 - 174	24,700	25,800
175 - 199	26,200	28,000
200 - 249	29,000	30,800
250 - 299	32,000	33,800
300 - 399	37,000	39,000
400 - 499[3]	41,900	43,600

[1] The minimum value for imports $1 to $250 is 1/20 of the estimated amount shown in the report. If the reduction of a particular low-value estimate by the amount shown in this column results in a figure which is less than 1/20 of the estimate, then for that figure this table overstates the amount by which complete tabulation could have reduced the value. The minimum value for any subgroup or country total is the fully compiled figure for imports $250 or more plus 1/20 of the estimated amount shown for $1 to $250 imports. (The fully compiled country total for imports $250 or more can be derived by subtracting from the country total the value shown for subgroup 94, "1 TO 250 DOLLARS EST," for that country.)

[2] Where commodities normally are not imported, an indication of zero shipments in the sample is, of course, probably not underestimated to this extent, if at all.

[3] If the number of shipments in the sample of $250 or less is greater than 499, then (a) the sampling variability for the estimates of the low-value shipments will generally be less than 7 percent; and (b) the sampling variability for the total of the fully compiled over $250 shipments and the estimated amounts for shipments valued $250 or less, combined, will generally be less than 1 percent.

the total" columns of the subgroup summary table on page 8 indicates that there were no imports valued at $250 or less appearing in the 5 percent sample for the country or subgroup and does not necessarily mean that low-value imports were not made. Similarly, the omission of a country name means that there were no imports valued at over $250 reported on formal consumption entries or any warehouse withdrawals for consumption and no imports valued at $250 or less appearing in the 5 percent sample.

I. Effect of Changes in Coverage on Comparability with Data for Periods Prior to January 1954

When using January 1954 or subsequent months' figures for purposes of comparison with figures for periods prior to January 1954, account must be taken of the coverage which was in effect for the earlier month, as well as the coverage effective January 1954. An article beginning on page 108 of the September 1953 *Notes* describes the coverage in effect for different periods of 1953. Coverage statements and explanations of any sampling procedures used are also included in the issues of Report No. FT 120 for the individual months of 1953. Since no information on imports covered by informal entries was included in any of the figures prior to January 1954, the country totals and subgroup totals (in the subgroup summary table) for January 1954 and subsequent months which include information on informal entries are not comparable in this respect to prior months. The country by subgroup and country by group figures (except group 9, as explained in section E, paragraph 2(c) above) in reports for January 1954 and subsequent months are comparable to months prior to January 1954 in the handling of information on informal entries, since no informal entry information is included in these detailed figures during either period. However, during the period July through December 1953, information on formal entries valued under $100 was excluded from the country by subgroup and country by group totals, and this would affect the comparability of the figures with those for other periods.

GENERAL EXPLANATION

COVERAGE

The import statistics include government as well as nongovernment shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from its territories and possessions and shipments between the territories and possessions are not reported as United States imports, but imports into Alaska, Hawaii, and Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of merchandise which moves into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value such as gifts valued at less than $100.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouse), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival, plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse, immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes. Information on merchandise withdrawn from bonded storage warehouses for exportation (not included in either imports for consumption or general imports) is also availabe for reference purposes.

Trade between the United States and its territories and possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of intransit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report, is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

VALUATION

The values are in general based on market or selling price, and are in general f.o.b. the exporting country. (Transportation costs to the United States may inadvertently be included in the case of merchandise which is not subject to an import duty based on value.) United States import duties are excluded.

COUNTRY OF ORIGIN

The country of origin is defined as the country where the merchandise was grown, mined or manufactured. In the event the importer can not readily obtain information as to the country of origin for a shipment, it is credited, for statistical purposes, to the country of shipment. Countries are reported as defined in Schedule C, *Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics*. Schedule C shows the descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of each country for statistical purposes. It is published as a part of Schedule A (see "Commodity Subgroup Information," below). A separate edition is also available free upon request to the Bureau of the Census. In this report countries are listed according to continents, in sequence within each continent from north to south and west to east, in accordance with their arrangement in Schedule C. The Table of Contents on page 7, which lists the countries in this order, will assist in locating the data for individual countries. The omission of a country name from this report indicates no imports from that country.

COMMODITY SUBGROUP INFORMATION

For presentation in this report, the commodity information compiled in terms of the classifications established in Schedule A, *Statistical Classification of Commodities Imported into the United States*, is summarized into approximately a hundred subgroups of related commodities. It is presented in the order in which the subgroup classifications are numbered in Schedule A. Reference to the table on page 8 will show the subgroup numbers, their unabbreviated descriptions, and the range of numbers of the individual Schedule A classifications included in each. For precise information as to the commodity content of individual subgroups, reference should be made to the descriptions in Schedule A of the numbered classifications included.

To save printing cost, complete country by subgroup information is not shown in this report. For each country, separate information is shown only for those subgroups whose individual totals for that country during the period covered by the report were $10,000 or more. Imports from each country of commodities falling in subgroups with individual totals of less than $10,000 for that country are presented as a combined total for each commodity group. Individual subgroup information for imports reported in these combined totals will be supplied upon request. A charge may be made to cover the cost of preparing this detailed information. The omission of a numbered subgroup under any country indicates no imports from that country, or imports less than $10,000.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report for earlier months of the current and previous year are shown at the back of the current month's report. With the exception of very important changes, any revisions to data for earlier years are held for reflection in the figures to be published in *Foreign Commerce and Navigation of the United States* for that year.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of *Foreign Commerce and Navigation of the United States*. Regular subscribers to FT reports are automatically supplied with copies of *Foreign Trade Statistics Notes*, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.). A catalog of *United States Foreign Trade Statistical Publications* is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports on a cost basis can also be arranged for to obtain additional detail compiled but not published. For free copies of the "Explanation of Statistics" or the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

**Import data on line labeled "1 TO 250 DOLLARS EST" are estimates based on 5% sample of informal entry and formal entry shipments valued $1-250. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample (shown immediately to the left of the double asterisk ("*")) to determine the reliability of the sample, see page 5.

**Import data on line labeled "1 TO 250 DOLLARS EST" are estimates based on 5% sample of informal entry and formal entry shipments valued $1-250. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "1 TO 250 DOLLARS EST" are estimates based on 5% sample of informal entry and formal entry shipments valued $1-250. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "1 TO 250 DOLLARS EST" are estimates based on 5% sample of informal entry and formal entry shipments valued $1-250. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk ("*")] to determine the reliability of the sample, see page 5.

**import data on line labeled "1 TO 250 DOLLARS EST" are estimates based on 5% sample of informal entry and formal entry shipments valued $1-250. Those estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample (shown immediately to the left of the double asterisk (**)) to determine the reliability of the sample, see page 5.

**Import data on line labeled "1 TO 250 DOLLARS EST" are estimates based on 5% sample of informal entry and formal entry shipments valued $1-250. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample (shown immediately to the left of the double asterisk ("*")) to determine the reliability of the sample, see page 5.

**Import data on line labeled "1 TO 250 DOLLARS EST" are estimates based on 5% sample of informal entry and formal entry shipments valued $1-250. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

REPORT NO. FT 120

EXPLANATION OF CHANGES IN COVERAGE AND OF THE SAMPLING PROCEDURE FOR ESTIMATING IMPORTS IN SHIPMENTS INDIVIDUALLY VALUED $250 OR LESS

A. Increase in Coverage of Import Totals by Inclusion of Informal Entries.

Effective January 1954, the coverage of the United States import statistics has been broadened to include, on a sample basis, imports individually valued $250 or less reported on *informal* entries, which total approximately $4 million per month. Imports on informal entries have not been included in the import statistics prior to January 1954. As explained below, they are being included, effective with January 1954, in the over-all and summary totals only, and are *not* included in the statistics compiled for the individual Schedule A commodity classifications.

B. Decrease in Coverage in Detailed Import Statistics.

Also effective with the January 1954 statistics, information on immediate consumption imports individually valued $250 or less reported on *formal* entries totaling approximately $4 million per month, is no longer included in the statistics for the individual Schedule A commodity classifications[1]. Like the imports valued $250 or less on *informal* entries, they are being included in the statistics on a sample basis, in the over-all and summary totals only. Thus the low-value imports which, according to sample studies made, have generally similar commodity distribution whether covered by formal or informal entries, are treated uniformly in the statistics.

C. Reasons for Changes and Explanation as to Methods Adopted.

The February 1954 issue of *Foreign Trade Statistics Notes* contains an explanation regarding the increase in the value limit from $100 to $250 for informal entries, effective September 1953, under the Customs Simplification Act; the consequent need for including information on imports covered by informal entries in the statistics; and the reasons why the changes described above were made as a result of this need.

D. The Estimating Procedures.

For imports individually valued $250 or less for both formal and informal entries, a 5 percent sample is taken, data are compiled from the sample and multiplied by 20 to obtain the estimates included in the statistics. These estimates are included only in the following summary totals:

1. The over-all import total (shown at the end of this report, labeled Grand Total).
2. The country totals (shown in this report).
3. The Customs District totals (not shown in this report, but published in FT 970).
4. The economic class totals (not shown in this report, but published in FT 930 and the *Quarterly Summary*).
5. The commodity subgroup and commodity group totals (included in summary table at the beginning of this report).

Information on imports individually valued $250 or less is excluded, as mentioned above, from the statistics for individual Schedule A commodity classifications, and from all statistics for cross-classifications such as commodity by country, country by subgroup, etc.

E. Summary of Effects on Report No. FT 120 of the Changes in Coverage and the Estimating Procedure.

As a result of the changes described above, the data in report No. FT 120 effective January 1954 are affected as follows:

1. The subgroup summary table shown on page 8.
   (a) The total value shown for each subgroup includes the estimate, if any, of the imports valued $250 or less for the subgroup, as well as the compiled total for imports valued at more than $250. The accuracy of the subgroup total may be affected by the estimating procedure (see section H below). In addition, the comparability of the subgroup total with the corresponding total for months prior to January 1954 may be affected by the inclusion of informal entries effective in January 1954. (See section F below.)
   (b) In addition to the subgroup total, there is shown for each subgroup the estimated amount for imports individually valued $250 or less, if any, which has been included in the subgroup total. The difference between this estimated amount and the subgroup total is, of course, the fully compiled figure for imports individually valued at more than $250.
   (c) There is also shown for each subgroup the number of items in the sample on which the estimate of the low-value imports was based. Use of this number to evaluate the accuracy of the estimate is explained in section H below.
2. The country, country by commodity group, and country by commodity subgroup figures in the main part of the report.
   (a) Country totals. The country totals consist of fully compiled information for imports valued at more than $250 plus an estimate of the imports valued $250 or less. The estimated amount included for shipments of $250 or less is shown for each country under arbitrary subgroup 94 appearing at the end of all of the commodity subgroups for that country. The difference between the country total and this estimated amount is the fully compiled total of imports from the country individually valued at more than $250. The country total has been increased by the inclusion of informal entries effective in January. (See section F below.) In addition, the accuracy of the country total may be affected by the estimating procedure for the shipments of $250 or less. (See section H below.)
   (b) Country by subgroup totals. The country by subgroup figures do not include any information on imports valued $250 or less except that, as described in (a) above, the estimate of the low-value imports for the country is shown under arbitrary subtroup 94.

[1] The terminology used in this statement, and in later references to "imports valued $250 or less covered by formal entries" is not strictly accurate, but has been adopted for convenience. Full compilation procedures are being continued for warehouse withdrawals, regardless of value.

Therefore, except for subgroup 94, the country by subgroup totals represent fully compiled figures for imports individually valued at more than $250. The coverage has been decreased by the exclusion of the $100 to $250 formal entry imports which were formerly included. (See sections G and I below.) For subgroup 94, the number of shipments in the sample upon which the estimate was based is shown at the right of the subgroup description. In order that the estimated data and the sample information may be readily identified, a double asterisk (**) appears at the right of the figure for the number in sample, immediately preceding the estimated value figure for subgroup 94. Use of the number in sample for subgroup 94 to evaluate the accuracy of the estimate and of the country total which includes it is explained in section H below. As in the past, country by subgroup items of less than $10,000 are combined on a commodity group basis. They are shown as "Subgroups valued under $10,000." However, in order that users may always be informed of the estimated amount for imports under $250 for a particular country, arbitrary subgroup 94 is always shown separately even if its value is less than $10,000. Therefore, if no item labeled subgroup 94 appears for a country, the user will know that no imports of $250 or less from that country appeared in the sample and no estimate for shipments of $250 or less is included in the country total.

(c) Country by group totals. The country by group totals other than for group 9 do not include any information on imports valued $250 or less. Coverage has been decreased by the exclusion of the $100 to $250 formal entry imports formerly included. The total for group 9 for the country includes the entire amount of the estimate of imports $250 or less for the country. This inclusion in group 9 is purely arbitrary, since the estimate covers all commodity groups for the country. See section H below in connection with evaluating the accuracy of the estimate.

F. The Effect of the Inclusion of Informal Entries in the Country Totals and Subgroup Totals Shown in this Report.

The import total has been increased by approximately $4 million because of the inclusion of informal entries. Some indication of the distribution of this increase by country may be available from tabulations prepared by the Bureau of the Census on the basis of the sample estimates. Users interested in this information for particular countries may make inquiry of the Bureau as to the information available. An indication of the distribution by subgroup, on the basis of a sample month, may be obtained from the article beginning on page 7 of the February 1954 *Notes*.

G. The Extent of Undercounting in Country by Subgroup and Country by Group Figures.

Only very rough measures can be given of the extent of undercounting which exists in the figures where the imports $250 or less are excluded.

1. The estimated total for imports individually valued $250 or less is $8 million per month ($4 million on informal and $4 million on formal entries). This represents about 1 percent of the total value of all imports. While the omission of the low-value shipments from the detailed statistics cannot, therefore have an important effect on the figures taken as a whole, it is possible that a high percentage of undercounting in individual detailed figures may result.
2. The estimate of the total imports valued $250 or less from the country is given in this report (arbitrary subgroup 94) and also the estimate of the low-value shipments for each subgroup (in the subgroup summary table). These figures may assist the user in estimating the degree of undercounting in the detailed figures from which the estimates are excluded. With allowances for sampling variability in the estimates (see section H below), the undercounting in a particular country by subgroup total would not be expected to be greater than the total amount of the low-value estimate for the country or than the total amount of the low-value estimate for the subgroup, whichever is less. In addition, the user's own knowledge of the usual pattern of shipments may enable him to make a rough approximation of the probabilities as to the distribution of the estimated total among the detailed items in the report.
3. Some indication of the undercounting on a 4-digit Schedule A commodity basis, without regard to country, is provided in the February 1954 *Notes*, in the form of data for a sample month.

H. The Accuracy of the Sample Estimates.

When statistics are estimated on the basis of a sample, exact agreement with the results that would have been obtained from a complete tabulation is not expected. The extent to which the estimated country totals and subgroup totals in this report for imports valued at $250 or less might not agree with a complete tabulation depends on the number of low-value shipments which fall in the sample. For each estimated figure in the report, the number in the sample on which the estimate was based is given.

As an example of the use of the table below, suppose an estimated value of $66,750 is based on 55 shipments in the sample. Referring to the line "50 - 64" one notes the values $14,200 and $16,000. This means that the chances are better than two out of three that a complete tabulation would have resulted in a figure between $52,550 ($66,750 reduced by $14,200) and $82,750 ($66,750 increased by $16,000). Similarly, a figure of $12,836,891 which represents a total of $12,770,141 for the fully compiled data for shipments valued at over $250 plus an estimated value of $66,750 based on 55 shipments in the sample would be between $12,822,691 ($12,836,891 reduced by $14,200) and $12,852,891 ($12,836,891 increased by $16,000).

In the event a user desires to combine two or more figures which are estimated values, or which include estimated values, the variability of the combined total can be determined by merely adding the sample size for each estimated value and then referring to the line on the reliability table applicable to the combined sample size.

The omission of (1) subgroup 94 for any country or (2) a figure in the $250 and under shipments included in

THE TABLE BELOW INDICATES THE DEGREE OF RELIABILITY TO BE ATTACHED TO A SPECIFIED VALUE:

If the number of shipments valued at $250 or less included in the sample, as indicated by the sample card count, is	Then the chances are better than 2 out of 3 that a complete tabulation would have resulted in a value figure between	
	The specified estimate reduced by [1]	And the specified estimate increased by
0	0	[2]$2,200
1	$1,600	4,400
2	2,500	5,100
3	3,200	5,600
4	3,700	6,100
5	4,200	6,500
6	4,600	6,900
7 or 8	5,400	7,600
9 or 10	6,000	8,100
11 - 14	6,800	8,800
15 - 19	7,600	9,600
20 - 29	9,100	10,900
30 - 39	10,800	12,600
40 - 49	12,400	14,200
50 - 64	14,200	16,000
65 - 79	16,000	17,800
80 - 99	17,900	19,700
100 - 124	20,300	22,100
125 - 149	22,500	24,200
150 - 174	24,700	25,800
175 - 199	26,200	28,000
200 - 249	29,000	30,900
250 - 299	32,000	33,800
300 - 399	37,000	39,000
400 - 499 [3]	41,900	43,600

[1] The minimum value for imports $1 to $250 is 1/20 of the estimated amount shown in the report. If the reduction of a particular low-value estimate by the amount shown in this column results in a figure which is less than 1/20 of the estimate, then for that figure this table overstates the amount by which complete tabulation could have reduced the value. The minimum value for any subgroup or country total is the fully compiled figure for imports $250 or more plus 1/20 of the estimated amount shown for $1 to $250 imports. (The fully compiled country total for imports $250 or more can be derived by subtracting from the country total the value shown for subgroup 94, "1 TO 250 DOLLARS EST," for that country.)

[2] Where commodities normally are not imported, an indication of zero shipments in the sample is, of course, probably not underestimated to this extent, if at all.

[3] If the number of shipments in the sample of $250 or less is greater than 499, then (a) the sampling variability for the estimates of the low-value shipments will generally be less than 7 percent; and (b) the sampling variability for the total of the fully compiled over $250 shipments and the estimated amounts for shipments valued $250 or less, combined, will generally be less than 1 percent.

the total" columns of the subgroup summary table on page 8 indicates that there were no imports valued at $250 or less appearing in the 5 percent sample for the country or subgroup and does not necessarily mean that low-value imports were not made. Similarly, the omission of a country name means that there were no imports valued at over $250 reported on formal consumption entries or any warehouse withdrawals for consumption and no imports valued at $250 or less appearing in the 5 percent sample.

I. Effect of Changes in Coverage on Comparability with Data for Periods Prior to January 1954

When using January 1954 or subsequent months' figures for purposes of comparison with figures for periods prior to January 1954, account must be taken of the coverage which was in effect for the earlier month, as well as the coverage effective January 1954. An article beginning on page 108 of the September 1953 *Notes* describes the coverage in effect for different periods of 1953. Coverage statements and explanations of any sampling procedures used are also included in the issues of Report No. FT 120 for the individual months of 1953. Since no information on imports covered by informal entries was included in any of the figures prior to January 1954, the country totals and subgroup totals (in the subgroup summary table) for January 1954 and subsequent months which include information on informal entries are not comparable in this respect to prior months. The country by subgroup and country by group figures (except group 9, as explained in section E, paragraph 2(c) above) in reports for January 1954 and subsequent months are comparable to months prior to January 1954 in the handling of information on informal entries, since no informal entry information is included in these detailed figures during either period. However, during the period July through December 1953, information on formal entries valued under $100 was excluded from the country by subgroup and country by group totals, and this would affect the comparability of the figures with those for other periods.

GENERAL EXPLANATION

COVERAGE

The import statistics include government as well as nongovernment shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from its territories and possessions and shipments between the territories and possessions are not reported as United States imports, but imports into Alaska, Hawaii, and Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of merchandise which moves into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value such as gifts valued at less than $100.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouse), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival, plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse, immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes. Information on merchandise withdrawn from bonded storage warehouses for exportation (not included in either imports for consumption or general imports) is also availabe for reference purposes.

Trade between the United States and its territories and possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of intransit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report, is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

VALUATION

The values are in general based on market or selling price, and are in general f.o.b. the exporting country. (Transportation costs to the United States may inadvertently be included in the case of merchandise which is not subject to an import duty based on value.) United States import duties are excluded.

COUNTRY OF ORIGIN

The country of origin is defined as the country where the merchandise was grown, mined or manufactured. In the event the importer can not readily obtain information as to the country of origin for a shipment, it is credited, for statistical purposes, to the country of shipment. Countries are reported as defined in Schedule C, *Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics*. Schedule C shows the descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of each country for statistical purposes. It is published as a part of Schedule A (see "Commodity Subgroup Information," below). A separate edition is also available free upon request to the Bureau of the Census. In this report countries are listed according to continents, in sequence within each continent from north to south and west to east, in accordance with their arrangement in Schedule C. The Table of Contents on page 7, which lists the countries in this order, will assist in locating the data for individual countries. The omission of a country name from this report indicates no imports from that country.

COMMODITY SUBGROUP INFORMATION

For presentation in this report, the commodity information compiled in terms of the classifications established in Schedule A, *Statistical Classification of Commodities Imported into the United States*, is summarized into approximately a hundred subgroups of related commodities. It is presented in the order in which the subgroup classifications are numbered in Schedule A. Reference to the table on page 8 will show the subgroup numbers, their unabbreviated descriptions, and the range of numbers of the individual Schedule A classifications included in each. For precise information as to the commodity content of individual subgroups, reference should be made to the descriptions in Schedule A of the numbered classifications included.

To save printing cost, complete country by subgroup information is not shown in this report. For each country, separate information is shown only for those subgroups whose individual totals for that country during the period covered by the report were $10,000 or more. Imports from each country of commodities falling in subgroups with individual totals of less than $10,000 for that country are presented as a combined total for each commodity group. Individual subgroup information for imports reported in these combined totals will be supplied upon request. A charge may be made to cover the cost of preparing this detailed information. The omission of a numbered subgroup under any country indicates no imports from that country, or imports less than $10,000.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report for earlier months of the current and previous year are shown at the back of the current month's report. With the exception of very important changes, any revisions to data for earlier years are held for reflection in the figures to be published in *Foreign Commerce and Navigation of the United States* for that year.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of *Foreign Commerce and Navigation of the United States*. Regular subscribers to FT reports are automatically supplied with copies of *Foreign Trade Statistics Notes*, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.). A catalog of *United States Foreign Trade Statistical Publications* is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports on a cost basis can also be arranged for to obtain additional detail compiled but not published. For free copies of the "Explanation of Statistics" or the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

**Import data on line labeled "1 TO 250 DOLLARS EST" are estimates based on 5% sample of informal entry and formal entry shipments valued $1-250. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "1 TO 250 DOLLARS EST" are estimates based on 5% sample of informal entry and formal entry shipments valued $1-250. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample (shown immediately to the left of the double asterisk ("*")) to determine the reliability of the sample, see page 5.

**import data on line labeled "1 TO 250 DOLLARS EST" are estimates based on 5% sample of informal entry and formal entry shipments valued $1-250. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample (shown immediately to the left of the double asterisk (**)) to determine the reliability of the sample, see page 5.

** Import data on line labeled "1 TO 250 DOLLARS EST" are estimates based on 5% sample of informal entry and formal entry shipments valued $1-250. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk ("*")] to determine the reliability of the sample, see page 5.

**Import data on line labeled "1 TO 250 DOLLARS EST" are estimates based on 5% sample of informal entry and formal entry shipments valued $1-250. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample (shown immediately to the left of the double asterisk (**)) to determine the reliability of the sample, see page 5.

9			2108*
	RHODESIA A NYASALAND TOTAL		3472595
	GRAND TOTAL		776777925

**Import data on line labeled "1 TO 250 DOLLARS EST" are estimates based on 5% sample of informal entry and formal entry shipments valued $1-250. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk ("*")] to determine the reliability of the sample, see page 5.

REPORT NO. FT 120

EXPLANATION OF CHANGES IN COVERAGE AND OF THE SAMPLING PROCEDURE FOR ESTIMATING IMPORTS IN SHIPMENTS INDIVIDUALLY VALUED $250 OR LESS

A. Increase in Coverage of Import Totals by Inclusion of Informal Entries.

Effective January 1954, the coverage of the United States import statistics has been broadened to include, on a sample basis, imports individually valued $250 or less reported on *informal* entries, which total approximately $4 million per month. Imports on informal entries have not been included in the import statistics prior to January 1954. As explained below, they are being included, effective with January 1954, in the over-all and summary totals only, and are *not* included in the statistics compiled for the individual Schedule A commodity classifications.

B. Decrease in Coverage in Detailed Import Statistics.

Also effective with the January 1954 statistics, information on immediate consumption imports individually valued $250 or less reported on *formal* entries totaling approximately $4 million per month, is no longer included in the statistics for the individual Schedule A commodity classifications[1]. Like the imports valued $250 or less on *informal* entries, they are being included in the statistics on a sample basis, in the over-all and summary totals only. Thus the low-value imports which, according to sample studies made, have generally similar commodity distribution whether covered by formal or informal entries, are treated uniformly in the statistics.

C. Reasons for Changes and Explanation as to Methods Adopted.

The February 1954 issue of *Foreign Trade Statistics Notes* contains an explanation regarding the increase in the value limit from $100 to $250 for informal entries, effective September 1953, under the Customs Simplification Act; the consequent need for including information on imports covered by informal entries in the statistics; and the reasons why the changes described above were made as a result of this need.

D. The Estimating Procedures.

For imports individually valued $250 or less for both formal and informal entries, a 5 percent sample is taken, data are compiled from the sample and multiplied by 20 to obtain the estimates included in the statistics. These estimates are included only in the following summary totals:

1. The over-all import total (shown at the end of this report, labeled Grand Total).
2. The country totals (shown in this report).
3. The Customs District totals (not shown in this report, but published in FT 970).
4. The economic class totals (not shown in this report, but published in FT 930 and the *Quarterly Summary*).
5. The commodity subgroup and commodity group totals (included in summary table at the beginning of this report).

Information on imports individually valued $250 or less is excluded, as mentioned above, from the statistics for individual Schedule A commodity classifications, and from all statistics for cross-classifications such as commodity by country, country by subgroup, etc.

E. Summary of Effects on Report No. FT 120 of the Changes in Coverage and the Estimating Procedure.

As a result of the changes described above, the data in report No. FT 120 effective January 1954 are affected as follows:

1. The subgroup summary table shown on page 8.
   (a) The total value shown for each subgroup includes the estimate, if any, of the imports valued $250 or less for the subgroup, as well as the compiled total for imports valued at more than $250. The accuracy of the subgroup total may be affected by the estimating procedure (see section H below). In addition, the comparability of the subgroup total with the corresponding total for months prior to January 1954 may be affected by the inclusion of informal entries effective in January 1954. (See section F below.)
   (b) In addition to the subgroup total, there is shown for each subgroup the estimated amount for imports individually valued $250 or less, if any, which has been included in the subgroup total. The difference between this estimated amount and the subgroup total is, of course, the fully compiled figure for imports individually valued at more than $250.
   (c) There is also shown for each subgroup the number of items in the sample on which the estimate of the low-value imports was based. Use of this number to evaluate the accuracy of the estimate is explained in section H below.
2. The country, country by commodity group, and country by commodity subgroup figures in the main part of the report.
   (a) Country totals. The country totals consist of fully compiled information for imports valued at more than $250 plus an estimate of the imports valued $250 or less. The estimated amount included for shipments of $250 or less is shown for each country under arbitrary subgroup 94 appearing at the end of all of the commodity subgroups for that country. The difference between the country total and this estimated amount is the fully compiled total of imports from the country individually valued at more than $250. The country total has been increased by the inclusion of informal entries effective in January. (See section F below.) In addition, the accuracy of the country total may be affected by the estimating procedure for the shipments of $250 or less. (See section H below.)
   (b) Country by subgroup totals. The country by subgroup figures do not include any information on imports valued $250 or less except that, as described in (a) above, the estimate of the low-value imports for the country is shown under arbitrary subgroup 94.

[1] The terminology used in this statement, and in later references to "imports valued $250 or less covered by formal entries" is not strictly accurate, but has been adopted for convenience. Full compilation procedures are being continued for warehouse withdrawals, regardless of value.

Therefore, except for subgroup 94, the country by subgroup totals represent fully compiled figures for imports individually valued at more than $250. The coverage has been decreased by the exclusion of the $100 to $250 formal entry imports which were formerly included. (See sections G and I below.) For subgroup 94, the number of shipments in the sample upon which the estimate was based is shown at the right of the subgroup description. In order that the estimated data and the sample information may be readily identified, a double asterisk (**) appears at the right of the figure for the number in sample, immediately preceding the estimated value figure for subgroup 94. Use of the number in sample for subgroup 94 to evaluate the accuracy of the estimate and of the country total which includes it is explained in section H below. As in the past, country by subgroup items of less than $10,000 are combined on a commodity group basis. They are shown as "Subgroups valued under $10,000." However, in order that users may always be informed of the estimated amount for imports under $250 for a particular country, arbitrary subgroup 94 is always shown separately even if its value is less than $10,000. Therefore, if no item labeled subgroup 94 appears for a country, the user will know that no imports of $250 or less from that country appeared in the sample and no estimate for shipments of $250 or less is included in the country total.

(c) Country by group totals. The country by group totals other than for group 9 do not include any information on imports valued $250 or less. Coverage has been decreased by the exclusion of the $100 to $250 formal entry imports formerly included. The total for group 9 for the country includes the entire amount of the estimate of imports $250 or less for the country. This inclusion in group 9 is purely arbitrary, since the estimate covers all commodity groups for the country. See section H below in connection with evaluating the accuracy of the estimate.

F. The Effect of the Inclusion of Informal Entries in the Country Totals and Subgroup Totals Shown in this Report.

The import total has been increased by approximately $4 million because of the inclusion of informal entries. Some indication of the distribution of this increase by country may be available from tabulations prepared by the Bureau of the Census on the basis of the sample estimates. Users interested in this information for particular countries may make inquiry of the Bureau as to the information available. An indication of the distribution by subgroup, on the basis of a sample month, may be obtained from the article beginning on page 7 of the February 1954 *Notes*.

G. The Extent of Undercounting in Country by Subgroup and Country by Group Figures.

Only very rough measures can be given of the extent of undercounting which exists in the figures where the imports $250 or less are excluded.

1. The estimated total for imports individually valued $250 or less is $8 million per month ($4 million on informal and $4 million on formal entries). This represents about 1 percent of the total value of all imports. While the omission of the low-value shipments from the detailed statistics cannot, therefore have an important effect on the figures taken as a whole, it is possible that a high percentage of undercounting in individual detailed figures may result.
2. The estimate of the total imports valued $250 or less from the country is given in this report (arbitrary subgroup 94) and also the estimate of the low-value shipments for each subgroup (in the subgroup summary table). These figures may assist the user in estimating the degree of undercounting in the detailed figures from which the estimates are excluded. With allowances for sampling variability in the estimates (see section H below), the undercounting in a particular country by subgroup total would not be expected to be greater than the total amount of the low-value estimate for the country or than the total amount of the low-value estimate for the subgroup, whichever is less. In addition, the user's own knowledge of the usual pattern of shipments may enable him to make a rough approximation of the probabilities as to the distribution of the estimated total among the detailed items in the report.
3. Some indication of the undercounting on a 4-digit Schedule A commodity basis, without regard to country, is provided in the February 1954 *Notes*, in the form of data for a sample month.

H. The Accuracy of the Sample Estimates.

When statistics are estimated on the basis of a sample, exact agreement with the results that would have been obtained from a complete tabulation is not expected. The extent to which the estimated country totals and subgroup totals in this report for imports valued at $250 or less might not agree with a complete tabulation depends on the number of low-value shipments which fall in the sample. For each estimated figure in the report, the number in the sample on which the estimate was based is given.

As an example of the use of the table below, suppose an estimated value of $66,750 is based on 55 shipments in the sample. Referring to the line "50 - 64" one notes the values $14,200 and $16,000. This means that the chances are better than two out of three that a complete tabulation would have resulted in a figure between $52,550 ($66,750 reduced by $14,200) and $82,750 ($66,750 increased by $16,000). Similarly, a figure of $12,836,891 which represents a total of $12,770,141 for the fully compiled data for shipments valued at over $250 plus an estimated value of $66,750 based on 55 shipments in the sample would be between $12,822,691 ($12,836,891 reduced by $14,200) and $12,852,891 ($12,836,891 increased by $16,000).

In the event a user desires to combine two or more figures which are estimated values, or which include estimated values, the variability of the combined total can be determined by merely adding the sample size for each estimated value and then referring to the line on the reliability table applicable to the combined sample size.

The omission of (1) subgroup 94 for any country or (2) a figure in the $250 and under shipments included in

THE TABLE BELOW INDICATES THE DEGREE OF RELIABILITY TO BE ATTACHED TO A SPECIFIED VALUE:

If the number of shipments valued at $250 or less included in the sample, as indicated by the sample card count, is	Then the chances are better than 2 out of 3 that a complete tabulation would have resulted in a value figure between	
	The specified estimate reduced by [1]	And the specified estimated increased by
0	0	[2]$2,200
1	$1,600	4,000
2	2,500	5,100
3	3,200	5,800
4	3,700	6,400
5	4,200	6,900
6	4,600	7,300
7 or 8	5,400	7,600
9 or 10	6,000	8,100
11 - 14	6,800	8,900
15 - 19	7,600	9,600
20 - 29	9,100	10,900
30 - 39	10,800	12,600
40 - 49	12,400	14,200
50 - 64	14,200	16,000
65 - 79	16,000	17,800
80 - 99	17,900	19,700
100 - 124	20,300	22,100
125 - 149	22,500	24,200
150 - 174	24,700	25,800
175 - 199	26,200	28,000
200 - 249	29,000	30,900
250 - 299	32,000	33,800
300 - 399	37,000	39,000
400 - 499 [3]	41,900	43,600

[1] The minimum value for imports $1 to $250 is 1/20 of the estimated amount shown in the report. If the reduction of a particular low-value estimate by the amount shown in this column results in a figure which is less than 1/20 of the estimate, then for that figure this table overstates the amount by which complete tabulation could have reduced the value. The minimum value for any subgroup or country total is the fully compiled figure for imports $250 or more plus 1/20 of the estimated amount shown for $1 to $250 imports. (The fully compiled country total for imports $250 or more can be derived by subtracting from the country total the value shown for subgroup 94, "1 TO 250 DOLLARS EST," for that country.)

[2] Where commodities normally are not imported, an indication of zero shipments in the sample is, of course, probably not underestimated to this extent, if at all.

[3] If the number of shipments in the sample of $250 or less is greater than 499, then (a) the sampling variability for the estimates of the low-value shipments will generally be less than 7 percent; and (b) the sampling variability for the total of the fully compiled over $250 shipments and the estimated amounts for shipments valued $250 or less, combined, will generally be less than 1 percent.

the total" columns of the subgroup summary table on page 8 indicates that there were no imports valued at $250 or less appearing in the 5 percent sample for the country or subgroup and does not necessarily mean that low-value imports were not made. Similarly, the omission of a country name means that there were no imports valued at over $250 reported on formal consumption entries or any warehouse withdrawals for consumption and no imports valued at $250 or less appearing in the 5 percent sample.

I. Effect of Changes in Coverage on Comparability with Data for Periods Prior to January 1954

When using January 1954 or subsequent months' figures for purposes of comparison with figures for periods prior to January 1954, account must be taken of the coverage which was in effect for the earlier month, as well as the coverage effective January 1954. An article beginning on page 108 of the September 1953 *Notes* describes the coverage in effect for different periods of 1953. Coverage statements and explanations of any sampling procedures used are also included in the issues of Report No. FT 120 for the individual months of 1953. Since no information on imports covered by informal entries was included in any of the figures prior to January 1954, the country totals and subgroup totals (in the subgroup summary table) for January 1954 and subsequent months which include information on informal entries are not comparable in this respect to prior months. The country by subgroup and country by group figures (except group 9, as explained in section E, paragraph 2(c) above) in reports for January 1954 and subsequent months are comparable to months prior to January 1954 in the handling of information on informal entries, since no informal entry information is included in these detailed figures during either period. However, during the period July through December 1953, information on formal entries valued under $100 was excluded from the country by subgroup and country by group totals, and this would affect the comparability of the figures with those for other periods.

GENERAL EXPLANATION

COVERAGE

The import statistics include government as well as nongovernment shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from its territories and possessions and shipments between the territories and possessions are not reported as United States imports, but imports into Alaska, Hawaii, and Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of merchandise which moves into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value such as gifts valued at less than $100.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released fromCustoms custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouse), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival, plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse, immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes. Information on merchandise withdrawn from bonded storage warehouses for exportation (not included in either imports for consumption or general imports) is also availabe for reference purposes.

Trade between the United States and its territories and possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of intransit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report, is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

VALUATION

The values are in general based on market or selling price, and are in general f.o.b. the exporting country. (Transportation costs to the United States may inadvertently be included in the case of merchandise which is not subject to an import duty based on value.) United States import duties are excluded.

COUNTRY OF ORIGIN

The country of origin is defined as the country where the merchandise was grown, mined or manufactured. In the event the importer can not readily obtain information as to the country of origin for a shipment, it is credited, for statistical purposes, to the country of shipment. Countries are reported as defined in Schedule C, *Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics*. Schedule C shows the descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of each country for statistical purposes. It is published as a part of Schedule A (see "Commodity Subgroup Information," below). A separate edition is also available free upon request to the Bureau of the Census. In this report countries are listed according to continents, in sequence within each continent from north to south and west to east, in accordance with their arrangement in Schedule C. The Table of Contents on page 7, which lists the countries in this order, will assist in locating the data for individual countries. The omission of a country name from this report indicates no imports from that country.

COMMODITY SUBGROUP INFORMATION

For presentation in this report, the commodity information compiled in terms of the classifications established in Schedule A, *Statistical Classification of Commodities Imported into the United States*, is summarized into approximately a hundred subgroups of related commodities. It is presented in the order in which the subgroup classifications are numbered in Schedule A. Reference to the table on page 8 will show the subgroup numbers, their unabbreviated descriptions, and the range of numbers of the individual Schedule A classifications included in each. For precise information as to the commodity content of individual subgroups, reference should be made to the descriptions in Schedule A of the numbered classifications included.

To save printing cost, complete country by subgroup information is not shown in this report. For each country, separate information is shown only for those subgroups whose individual totals for that country during the period covered by the report were $10,000 or more. Imports from each country of commodities falling in subgroups with individual totals of less than $10,000 for that country are presented as a combined total for each commodity group. Individual subgroup information for imports reported in these combined totals will be supplied upon request. A charge may be made to cover the cost of preparing this detailed information. The omission of a numbered subgroup under any country indicates no imports from that country, or imports less than $10,000.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report for earlier months of the current and previous year are shown at the back of the current month's report. With the exception of very important changes, any revisions to data for earlier years are held for reflection in the figures to be published in *Foreign Commerce and Navigation of the United States* for that year.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS.

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of *Foreign Commerce and Navigation of the United States*. Regular subscribers to FT reports are automatically supplied with copies of *Foreign Trade Statistics Notes*, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.). A catalog of *United States Foreign Trade Statistical Publications* is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports on a cost basis can also be arranged for to obtain additional detail compiled but not published. For free copies of the "Explanation of Statistics" or the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

**Import data on line labeled "1 TO 250 DOLLARS EST" are ostimates based on 5% sample of informel entry and formal entry shipments valued $1-250. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample (shown immediately to the left of the double esterisk ("*")) to determine the reliability of the semple, see page 5.

**Import data on line labeled "1 TO 250 DOLLARS EST" are estimates based on 5% sample of informal entry and formal entry shipments valued $1-250. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk ("*")] to determine the reliability of the sample, see page 5.

**Import data on line labeled "1 TO 250 DOLLARS EST" are estimates based on 5% sample of informal entry and formal entry shipments valued $1-250. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

REPORT NO. FT 120

EXPLANATION OF CHANGES IN COVERAGE AND OF THE SAMPLING PROCEDURE FOR ESTIMATING IMPORTS IN SHIPMENTS INDIVIDUALLY VALUED $250 OR LESS

A. Increase in Coverage of Import Totals by Inclusion of Informal Entries.

Effective January 1954, the coverage of the United States import statistics has been broadened to include, on a sample basis, imports individually valued $250 or less reported on *informal* entries, which total approximately $4 million per month. Imports on informal entries have not been included in the import statistics prior to January 1954. As explained below, they are being included, effective with January 1954, in the over-all and summary totals only, and are *not* included in the statistics compiled for the individual Schedule A commodity classifications.

B. Decrease in Coverage in Detailed Import Statistics.

Also effective with the January 1954 statistics, information on immediate consumption imports individually valued $250 or less reported on *formal* entries totaling approximately $4 million per month, is no longer included in the statistics for the individual Schedule A commodity classifications[1]. Like the imports valued $250 or less on *informal* entries, they are being included in the statistics on a sample basis, in the over-all and summary totals only. Thus the low-value imports which, according to sample studies made, have generally similar commodity distribution whether covered by formal or informal entries, are treated uniformly in the statistics.

C. Reasons for Changes and Explanation as to Methods Adopted.

The February 1954 issue of *Foreign Trade Statistics Notes* contains an explanation regarding the increase in the value limit from $100 to $250 for informal entries, effective September 1953, under the Customs Simplification Act; the consequent need for including information on imports covered by informal entries in the statistics; and the reasons why the changes described above were made as a result of this need.

D. The Estimating Procedures.

For imports individually valued $250 or less for both formal and informal entries, a 5 percent sample is taken, data are compiled from the sample and multiplied by 20 to obtain the estimates included in the statistics. These estimates are included only in the following summary totals:

1. The over-all import total (shown at the end of this report, labeled Grand Total).
2. The country totals (shown in this report).
3. The Customs District totals (not shown in this report, but published in FT 970).
4. The economic class totals (not shown in this report, but published in FT 930 and the *Quarterly Summary*).
5. The commodity subgroup and commodity group totals (included in summary table at the beginning of this report).

Information on imports individually valued $250 or less is excluded, as mentioned above, from the statistics for individual Schedule A commodity classifications, and from all statistics for cross-classifications such as commodity by country, country by subgroup, etc.

E. Summary of Effects on Report No. FT 120 of the Changes in Coverage and the Estimating Procedure.

As a result of the changes described above, the data in report No. FT 120 effective January 1954 are affected as follows:

1. The subgroup summary table shown on page 8.
   (a) The total value shown for each subgroup includes the estimate, if any, of the imports valued $250 or less for the subgroup, as well as the compiled total for imports valued at more than $250. The accuracy of the subgroup total may be affected by the estimating procedure (see section H below). In addition, the comparability of the subgroup total with the corresponding total for months prior to January 1954 may be affected by the inclusion of informal entries effective in January 1954. (See section F below.)
   (b) In addition to the subgroup total, there is shown for each subgroup the estimated amount for imports individually valued $250 or less, if any, which has been included in the subgroup total. The difference between this estimated amount and the subgroup total is, of course, the fully compiled figure for imports individually valued at more than $250.
   (c) There is also shown for each subgroup the number of items in the sample on which the estimate of the low-value imports was based. Use of this number to evaluate the accuracy of the estimate is explained in section H below.
2. The country, country by commodity group, and country by commodity subgroup figures in the main part of the report.
   (a) Country totals. The country totals consist of fully compiled information for imports valued at more than $250 plus an estimate of the imports valued $250 or less. The estimated amount included for shipments of $250 or less is shown for each country under arbitrary subgroup 94 appearing at the end of all of the commodity subgroups for that country. The difference between the country total and this estimated amount is the fully compiled total of imports from the country individually valued at more than $250. The country total has been increased by the inclusion of informal entries effective in January. (See section F below.) In addition, the accuracy of the country total may be affected by the estimating procedure for the shipments of $250 or less. (See section H below.)
   (b) Country by subgroup totals. The country by subgroup figures do not include any information on imports valued $250 or less except that, as described in (a) above, the estimate of the low-value imports for the country is shown under arbitrary subtroup 94.

[1] The terminology used in this statement, and in later references to "imports valued $250 or less covered by formal entries" is not strictly accurate, but has been adopted for convenience. Full compilation procedures are being continued for warehouse withdrawals, regardless of value.

Therefore, except for subgroup 94, the country by subgroup totals represent fully compiled figures for imports individually valued at more than $250. The coverage has been decreased by the exclusion of the $100 to $250 formal entry imports which were formerly included. (See sections G and I below.) For subgroup 94, the number of shipments in the sample upon which the estimate was based is shown at the right of the subgroup description. In order that the estimated data and the sample information may be readily identified, a double asterisk (**) appears at the right of the figure for the number in sample, immediately preceding the estimated value figure for subgroup 94. Use of the number in sample for subgroup 94 to evaluate the accuracy of the estimate and of the country total which includes it is explained in section H below. As in the past, country by subgroup items of less than $10,000 are combined on a commodity group basis. They are shown as "Subgroups valued under $10,000." However, in order that users may always be informed of the estimated amount for imports under $250 for a particular country, arbitrary subgroup 94 is always shown separately even if its value is less than $10,000. Therefore, if no item labeled subgroup 94 appears for a country, the user will know that no imports of $250 or less from that country appeared in the sample and no estimate for shipments of $250 or less is included in the country total.

(c) Country by group totals. The country by group totals other than for group 9 do not include any information on imports valued $250 or less. Coverage has been decreased by the exclusion of the $100 to $250 formal entry imports formerly included. The total for group 9 for the country includes the entire amount of the estimate of imports $250 or less for the country. This inclusion in group 9 is purely arbitrary, since the estimate covers all commodity groups for the country. See section H below in connection with evaluating the accuracy of the estimate.

F. The Effect of the Inclusion of Informal Entries in the Country Totals and Subgroup Totals Shown in this Report.

The import total has been increased by approximately $4 million because of the inclusion of informal entries. Some indication of the distribution of this increase by country may be available from tabulations prepared by the Bureau of the Census on the basis of the sample estimates. Users interested in this information for particular countries may make inquiry of the Bureau as to the information available. An indication of the distribution by subgroup, on the basis of a sample month, may be obtained from the article beginning on page 7 of the February 1954 *Notes*.

G. The Extent of Undercounting in Country by Subgroup and Country by Group Figures.

Only very rough measures can be given of the extent of undercounting which exists in the figures where the imports $250 or less are excluded.

1. The estimated total for imports individually valued $250 or less is $8 million per month ($4 million on informal and $4 million on formal entries). This represents about 1 percent of the total value of all imports. While the omission of the low-value shipments from the detailed statistics cannot, therefore have an important effect on the figures taken as a whole, it is possible that a high percentage of undercounting in individual detailed figures may result.
2. The estimate of the total imports valued $250 or less from the country is given in this report (arbitrary subgroup 94) and also the estimate of the low-value shipments for each subgroup (in the subgroup summary table). These figures may assist the user in estimating the degree of undercounting in the detailed figures from which the estimates are excluded. With allowances for sampling variability in the estimates (see section H below), the undercounting in a particular country by subgroup total would not be expected to be greater than the total amount of the low-value estimate for the country or than the total amount of the low-value estimate for the subgroup, whichever is less. In addition, the user's own knowledge of the usual pattern of shipments may enable him to make a rough approximation of the probabilities as to the distribution of the estimated total among the detailed items in the report.
3. Some indication of the undercounting on a 4-digit Schedule A commodity basis, without regard to country, is provided in the February 1954 *Notes*, in the form of data for a sample month.

H. The Accuracy of the Sample Estimates.

When statistics are estimated on the basis of a sample, exact agreement with the results that would have been obtained from a complete tabulation is not expected. The extent to which the estimated country totals and subgroup totals in this report for imports valued at $250 or less might not agree with a complete tabulation depends on the number of low-value shipments which fall in the sample. For each estimated figure in the report, the number in the sample on which the estimate was based is given.

As an example of the use of the table below, suppose an estimated value of $66,750 is based on 55 shipments in the sample. Referring to the line "50 - 64" one notes the values $14,200 and $16,000. This means that the chances are better than two out of three that a complete tabulation would have resulted in a figure between $52,550 ($66,750 reduced by $14,200) and $82,750 ($66,750 increased by $16,000). Similarly, a figure of $12,836,891 which represents a total of $12,770,141 for the fully compiled data for shipments valued at over $250 plus an estimated value of $66,750 based on 55 shipments in the sample would be between $12,822,691 ($12,836,891 reduced by $14,200) and $12,852,891 ($12,836,891 increased by $16,000).

In the event a user desires to combine two or more figures which are estimated values, or which include estimated values, the variability of the combined total can be determined by merely adding the sample size for each estimated value and then referring to the line on the reliability table applicable to the combined sample size.

The omission of (1) subgroup 94 for any country or (2) a figure in the $250 and under shipments included in

THE TABLE BELOW INDICATES THE DEGREE OF RELIABILITY TO BE ATTACHED TO A SPECIFIED VALUE:

If the number of shipments valued at $250 or less included in the sample, as indicated by the sample card count, is	Then the chances are better than 2 out of 3 that a complete tabulation whould have resulted in a value figure between	
	The specified estimate reduced by[1]	And the specified estimated increased by
1	0	[2]$2,200
1	$1,600	4,400
2	2,500	5,100
3	3,200	5,600
4	3,700	6,100
5	4,200	6,500
6	4,600	6,900
7 or 8	5,400	7,600
9 or 10	6,000	8,100
11 - 14	6,800	8,800
15 - 19	7,600	9,600
20 - 29	9,100	10,900
30 - 39	10,800	12,600
40 - 49	12,400	14,200
50 - 64	14,200	16,000
65 - 79	16,000	17,800
80 - 99	17,900	19,700
100 - 124	20,300	22,100
125 - 149	22,500	24,200
150 - 174	24,700	25,800
175 - 199	26,200	28,000
200 - 249	29,000	30,900
250 - 299	32,000	33,800
300 - 399	37,000	39,000
400 - 499[3]	41,900	43,600

[1] The minimum value for imports $1 to $250 is 1/20 of the estimated amount shown in the report. If the reduction of a particular low-value estimate by the amount shown in this column results in a figure which is less than 1/20 of the estimate, then for that figure this table overstates the amount by which complete tabulation could have reduced the value. The minimum value for any subgroup or country total is the fully compiled figure for imports $250 or more plus 1/20 of the estimated amount shown for $1 to $250 imports. (The fully compiled country total for imports $250 or more can be derived by subtracting from the country total the value shown for subgroup 94, "1 TO 250 DOLLARS EST," for that country.)

[2] Where commodities normally are not imported, an indication of zero shipments in the sample is, of course, probably not underestimated to this extent, if at all.

[3] If the number of shipments in the sample of $250 or less is greater than 499, then (a) the sampling variability for the estimates of the low-value shipments will generally be less than 7 percent; and (b) the sampling variability for the total of the fully compiled over $250 shipments and the estimated amounts for shipments valued $250 or less, combined, will generally be less than 1 percent.

the total" columns of the subgroup summary table on page 8 indicates that there were no imports valued at $250 or less appearing in the 5 percent sample for the country or subgroup and does not necessarily mean that low-value imports were not made. Similarly, the omission of a country name means that there were no imports valued at over $250 reported on formal consumption entries or any warehouse withdrawals for consumption and no imports valued at $250 or less appearing in the 5 percent sample.

I. Effect of Changes in Coverage on Comparability with Data for Periods Prior to January 1954

When using January 1954 or subsequent months' figures for purposes of comparison with figures for periods prior to January 1954, account must be taken of the coverage which was in effect for the earlier month, as well as the coverage effective January 1954. An article beginning on page 108 of the September 1953 *Notes* describes the coverage in effect for different periods of 1953. Coverage statements and explanations of any sampling procedures used are also included in the issues of Report No. FT 120 for the individual months of 1953. Since no information on imports covered by informal entries was included in any of the figures prior to January 1954, the country totals and subgroup totals (in the subgroup summary table) for January 1954 and subsequent months which include information on informal entries are not comparable in this respect to prior months. The country by subgroup and country by group figures (except group 9, as explained in section E, paragraph 2(c) above) in reports for January 1954 and subsequent months are comparable to months prior to January 1954 in the handling of information on informal entries, since no informal entry information is included in these detailed figures during either period. However, during the period July through December 1953, information on formal entries valued under $100 was excluded from the country by subgroup and country by group totals, and this would affect the comparability of the figures with those for other periods.

GENERAL EXPLANATION

COVERAGE

The import statistics include government as well as nongovernment shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from its territories and possessions and shipments between the territories and possessions are not reported as United States imports, but imports into Alaska, Hawaii, and Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of merchandise which moves into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value such as gifts valued at less than $100.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouse), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival, plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse, immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes. Information on merchandise withdrawn from bonded storage warehouses for exportation (not included in either imports for consumption or general imports) is also availabe for reference purposes.

Trade between the United States and its territories and possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of intransit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report, is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

VALUATION

The values are in general based on market or selling price, and are in general f.o.b. the exporting country. (Transportation costs to the United States may inadvertently be included in the case of merchandise which is not subject to an import duty based on value.) United States import duties are excluded.

COUNTRY OF ORIGIN

The country of origin is defined as the country where the merchandise was grown, mined or manufactured. In the event the importer can not readily obtain information as to the country of origin for a shipment, it is credited, for statistical purposes, to the country of shipment. Countries are reported as defined in Schedule C, *Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics*. Schedule C shows the descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of each country for statistical purposes. It is published as a part of Schedule A (see "Commodity Subgroup Information," below). A separate edition is also available free upon request to the Bureau of the Census. In this report countries are listed according to continents, in sequence within each continent from north to south and west to east, in accordance with their arrangement in Schedule C. The Table of Contents on page 7, which lists the countries in this order, will assist in locating the data for individual countries. The omission of a country name from this report indicates no imports from that country.

COMMODITY SUBGROUP INFORMATION

For presentation in this report, the commodity information compiled in terms of the classifications established in Schedule A, *Statistical Classification of Commodities Imported into the United States*, is summarized into approximately a hundred subgroups of related commodities. It is presented in the order in which the subgroup classifications are numbered in Schedule A. Reference to the table on page 8 will show the subgroup numbers, their unabbreviated descriptions, and the range of numbers of the individual Schedule A classifications included in each. For precise information as to the commodity content of individual subgroups, reference should be made to the descriptions in Schedule A of the numbered classifications included.

To save printing cost, complete country by subgroup information is not shown in this report. For each country, separate information is shown only for those subgroups whose individual totals for that country during the period covered by the report were $10,000 or more. Imports from each country of commodities falling in subgroups with individual totals of less than $10,000 for that country are presented as a combined total for each commodity group. Individual subgroup information for imports reported in these combined totals will be supplied upon request. A charge may be made to cover the cost of preparing this detailed information. The omission of a numbered subgroup under any country indicates no imports from that country, or imports less than $10,000.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report for earlier months of the current and previous year are shown at the back of the current month's report. With the exception of very important changes, any revisions to data for earlier years are held for reflection in the figures to be published in *Foreign Commerce and Navigation of the United States* for that year.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of *Foreign Commerce and Navigation of the United States*. Regular subscribers to FT reports are automatically supplied with copies of *Foreign Trade Statistics Notes*, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.). A catalog of *United States Foreign Trade Statistical Publications* is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports on a cost basis can also be arranged for to obtain additional detail compiled but not published. For free copies of the "Explanation of Statistics" or the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

**Import data on line labeled "1 TO 250 DOLLARS EST" are estimates based on 5% sample of informal entry and formal entry shipments valued $1-250. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "1 TO 250 DOLLARS EST" are estimates based on 5% sample of informal entry and formal entry shipments valued $1-250. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk ("")] to determine the reliability of the sample, see page 5.

REPORT NO. FT 120

EXPLANATION OF CHANGES IN COVERAGE AND OF THE SAMPLING PROCEDURE FOR ESTIMATING IMPORTS IN SHIPMENTS INDIVIDUALLY VALUED $250 OR LESS

A. Increase in Coverage of Import Totals by Inclusion of Informal Entries.

Effective January 1954, the coverage of the United States import statistics has been broadened to include, on a sample basis, imports individually valued $250 or less reported on *informal* entries, which total approximately $4 million per month. Imports on informal entries have not been included in the import statistics prior to January 1954. As explained below, they are being included, effective with January 1954, in the over-all and summary totals only, and are *not* included in the statistics compiled for the individual Schedule A commodity classifications.

B. Decrease in Coverage in Detailed Import Statistics.

Also effective with the January 1954 statistics, information on immediate consumption imports individually valued $250 or less reported on *formal* entries totaling approximately $4 million per month, is no longer included in the statistics for the individual Schedule A commodity classifications[1]. Like the imports valued $250 or less on *informal* entries, they are being included in the statistics on a sample basis, in the over-all and summary totals only. Thus the low-value imports which, according to sample studies made, have generally similar commodity distribution whether covered by formal or informal entries, are treated uniformly in the statistics.

C. Reasons for Changes and Explanation as to Methods Adopted.

The February 1954 issue of *Foreign Trade Statistics Notes* contains an explanation regarding the increase in the value limit from $100 to $250 for informal entries, effective September 1953, under the Customs Simplification Act; the consequent need for including information on imports covered by informal entries in the statistics; and the reasons why the changes described above were made as a result of this need.

D. The Estimating Procedures.

For imports individually valued $250 or less for both formal and informal entries, a 5 percent sample is taken, data are compiled from the sample and multiplied by 20 to obtain the estimates included in the statistics. These estimates are included only in the following summary totals:

1. The over-all import total (shown at the end of this report, labeled Grand Total).
2. The country totals (shown in this report).
3. The Customs District totals (not shown in this report, but published in FT 970).
4. The economic class totals (not shown in this report, but published in FT 930 and the *Quarterly Summary*).
5. The commodity subgroup and commodity group totals (included in summary table at the beginning of this report).

Information on imports individually valued $250 or less is excluded, as mentioned above, from the statistics for individual Schedule A commodity classifications, and from all statistics for cross-classifications such as commodity by country, country by subgroup, etc.

E. Summary of Effects on Report No. FT 120 of the Changes in Coverage and the Estimating Procedure.

As a result of the changes described above, the data in report No. FT 120 effective January 1954 are affected as follows:

1. The subgroup summary table shown on page 8.
   (a) The total value shown for each subgroup includes the estimate, if any, of the imports valued $250 or less for the subgroup, as well as the compiled total for imports valued at more than $250. The accuracy of the subgroup total may be affected by the estimating procedure (see section H below). In addition, the comparability of the subgroup total with the corresponding total for months prior to January 1954 may be affected by the inclusion of informal entries effective in January 1954. (See section F below.)
   (b) In addition to the subgroup total, there is shown for each subgroup the estimated amount for imports individually valued $250 or less, if any, which has been included in the subgroup total. The difference between this estimated amount and the subgroup total is, of course, the fully compiled figure for imports individually valued at more than $250.
   (c) There is also shown for each subgroup the number of items in the sample on which the estimate of the low-value imports was based. Use of this number to evaluate the accuracy of the estimate is explained in section H below.
2. The country, country by commodity group, and country by commodity subgroup figures in the main part of the report.
   (a) Country totals. The country totals consist of fully compiled information for imports valued at more than $250 plus an estimate of the imports valued $250 or less. The estimated amount included for shipments of $250 or less is shown for each country under arbitrary subgroup 94 appearing at the end of all of the commodity subgroups for that country. The difference between the country total and this estimated amount is the fully compiled total of imports from the country individually valued at more than $250. The country total has been increased by the inclusion of informal entries effective in January. (See section F below.) In addition, the accuracy of the country total may be affected by the estimating procedure for the shipments of $250 or less. (See section H below.)
   (b) Country by subgroup totals. The country by subgroup figures do not include any information on imports valued $250 or less except that, as described in (a) above, the estimate of the low-value imports for the country is shown under arbitrary subtroup 94.

[1]The terminology used in this statement, and in later references to "imports valued $250 or less covered by formal entries" is not strictly accurate, but has been adopted for convenience. Full compilation procedures are being continued for warehouse withdrawals, regardless of value.

Therefore, except for subgroup 94, the country by subgroup totals represent fully compiled figures for imports individually valued at more than $250. The coverage has been decreased by the exclusion of the $100 to $250 formal entry imports which were formerly included. (See sections G and I below.) For subgroup 94, the number of shipments in the sample upon which the estimate was based is shown at the right of the subgroup description. In order that the estimated data and the sample information may be readily identified, a double asterisk (**) appears at the right of the figure for the number in sample, immediately preceding the estimated value figure for subgroup 94. Use of the number in sample for subgroup 94 to evaluate the accuracy of the estimate and of the country total which includes it is explained in section H below. As in the past, country by subgroup items of less than $10,000 are combined on a commodity group basis. They are shown as "Subgroups valued under $10,000." However, in order that users may always be informed of the estimated amount for imports under $250 for a particular country, arbitrary subgroup 94 is always shown separately even if its value is less than $10,000. Therefore, if no item labeled subgroup 94 appears for a country, the user will know that no imports of $250 or less from that country appeared in the sample and no estimate for shipments of $250 or less is included in the country total.

(c) Country by group totals. The country by group totals other than for group 9 do not include any information on imports valued $250 or less. Coverage has been decreased by the exclusion of the $100 to $250 formal entry imports formerly included. The total for group 9 for the country includes the entire amount of the estimate of imports $250 or less for the country. This inclusion in group 9 is purely arbitrary, since the estimate covers all commodity groups for the country. See section H below in connection with evaluating the accuracy of the estimate.

F. The Effect of the Inclusion of Informal Entries in the Country Totals and Subgroup Totals Shown in this Report.

The import total has been increased by approximately $4 million because of the inclusion of informal entries. Some indication of the distribution of this increase by country may be available from tabulations prepared by the Bureau of the Census on the basis of the sample estimates. Users interested in this information for particular countries may make inquiry of the Bureau as to the information available. An indication of the distribution by subgroup, on the basis of a sample month, may be obtained from the article beginning on page 7 of the February 1954 *Notes*.

G. The Extent of Undercounting in Country by Subgroup and Country by Group Figures.

Only very rough measures can be given of the extent of undercounting which exists in the figures where the imports $250 or less are excluded.

1. The estimated total for imports individually valued $250 or less is $8 million per month ($4 million on informal and $4 million on formal entries). This represents about 1 percent of the total value of all imports. While the omission of the low-value shipments from the detailed statistics cannot, therefore have an important effect on the figures taken as a whole, it is possible that a high percentage of undercounting in individual detailed figures may result.
2. The estimate of the total imports valued $250 or less from the country is given in this report (arbitrary subgroup 94) and also the estimate of the low-value shipments for each subgroup (in the subgroup summary table). These figures may assist the user in estimating the degree of undercounting in the detailed figures from which the estimates are excluded. With allowances for sampling variability in the estimates (see section H below), the undercounting in a particular country by subgroup total would not be expected to be greater than the total amount of the low-value estimate for the country or than the total amount of the low-value estimate for the subgroup, whichever is less. In addition, the user's own knowledge of the usual pattern of shipments may enable him to make a rough approximation of the probabilities as to the distribution of the estimated total among the detailed items in the report.
3. Some indication of the undercounting on a 4-digit Schedule A commodity basis, without regard to country, is provided in the February 1954 *Notes*, in the form of data for a sample month.

H. The Accuracy of the Sample Estimates.

When statistics are estimated on the basis of a sample, exact agreement with the results that would have been obtained from a complete tabulation is not expected. The extent to which the estimated country totals and subgroup totals in this report for imports valued at $250 or less might not agree with a complete tabulation depends on the number of low-value shipments which fall in the sample. For each estimated figure in the report, the number in the sample on which the estimate was based is given.

As an example of the use of the table below, suppose an estimated value of $66,750 is based on 55 shipments in the sample. Referring to the line "50 - 64" one notes the values $14;200 and $16,000. This means that the chances are better than two out of three that a complete tabulation would have resulted in a figure between $52,550 ($66,750 reduced by $14,200) and $82,750 ($66,750 increased by $16,000). Similarly, a figure of $12,836,891 which represents a total of $12,770,141 for the fully compiled data for shipments valued at over $250 plus an estimated value of $66,750 based on 55 shipments in the sample would be between $12,822,691 ($12,836,891 reduced by $14,200) and $12,852,891 ($12,836,891 increased by $16,000).

In the event a user desires to combine two or more figures which are estimated values, or which include estimated values, the variability of the combined total can be determined by merely adding the sample size for each estimated value and then referring to the line on the reliability table applicable to the combined sample size.

The omission of (1) subgroup 94 for any country or (2) a figure in the $250 and under shipments included in

THE TABLE BELOW INDICATES THE DEGREE OF RELIABILITY TO BE ATTACHED TO A SPECIFIED VALUE:

If the number of shipments valued at $250 or less included in the sample, as indicated by the sample card count, is	Then the chances are better than 2 out of 3 that a complete tabulation would have resulted in a value figure between	
	The specified estimate reduced by [1]	And the specified estimated increased by
0	0	[2]$2,200
1	$1,600	4,400
2	2,500	5,100
3	3,200	5,600
4	3,700	6,100
5	4,200	6,500
6	4,600	6,900
7 or 8	5,400	7,600
9 or 10	6,000	8,100
11 - 14	6,800	8,900
15 - 19	7,600	9,600
20 - 29	9,100	10,900
30 - 39	10,800	12,600
40 - 49	12,400	14,200
50 - 64	14,200	16,000
65 - 79	16,000	17,800
80 - 99	17,900	19,700
100 - 124	20,300	22,100
125 - 149	22,500	24,200
150 - 174	24,700	25,800
175 - 199	26,200	28,000
200 - 249	29,000	30,800
250 - 299	32,000	33,800
300 - 399	37,000	39,000
400 - 499 [3]	41,900	43,600

[1] The minimum value for imports $1 to $250 is 1/20 of the estimated amount shown in the report. If the reduction of a particular low-value estimate by the amount shown in this column results in a figure which is less than 1/20 of the estimate, then for that figure this table overstates the amount by which complete tabulation could have reduced the value. The minimum value for any subgroup or country total is the fully compiled figure for imports $250 or more plus 1/20 of the estimated amount shown for $1 to $250 imports. (The fully compiled country total for imports $250 or more can be derived by subtracting from the country total the value shown for subgroup 94, "1 TO 250 DOLLARS EST," for that country.)

[2] Where commodities normally are not imported, an indication of zero shipments in the sample is, of course, probably not underestimated to this extent, if at all.

[3] If the number of shipments in the sample of $250 or less is greater than 499, then (a) the sampling variability for the estimates of the low-value shipments will generally be less than 7 percent; and (b) the sampling variability for the total of the fully compiled over $250 shipments and the estimated amounts for shipments valued $250 or less, combined, will generally be less than 1 percent.

the total" columns of the subgroup summary table on page 8 indicates that there were no imports valued at $250 or less appearing in the 5 percent sample for the country or subgroup and does not necessarily mean that low-value imports were not made. Similarly, the omission of a country name means that there were no imports valued at over $250 reported on formal consumption entries or any warehouse withdrawals for consumption and no imports valued at $250 or less appearing in the 5 percent sample.

I. Effect of Changes in Coverage on Comparability with Data for Periods Prior to January 1954

When using January 1954 or subsequent months' figures for purposes of comparison with figures for periods prior to January 1954, account must be taken of the coverage which was in effect for the earlier month, as well as the coverage effective January 1954. An article beginning on page 108 of the September 1953 *Notes* describes the coverage in effect for different periods of 1953. Coverage statements and explanations of any sampling procedures used are also included in the issues of Report No. FT 120 for the individual months of 1953. Since no information on imports covered by informal entries was included in any of the figures prior to January 1954, the country totals and subgroup totals (in the subgroup summary table) for January 1954 and subsequent months which include information on informal entries are not comparable in this respect to prior months. The country by subgroup and country by group figures (except group 9, as explained in section E, paragraph 2(c) above) in reports for January 1954 and subsequent months are comparable to months prior to January 1954 in the handling of information on informal entries, since no informal entry information is included in these detailed figures during either period. However, during the period July through December 1953, information on formal entries valued under $100 was excluded from the country by subgroup and country by group totals, and this would affect the comparability of the figures with those for other periods.

GENERAL EXPLANATION

COVERAGE

The import statistics include government as well as nongovernment shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from its territories and possessions and shipments between the territories and possessions are not reported as United States imports, but imports into Alaska, Hawaii, and Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of merchandise which moves into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value such as gifts valued at less than $100.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouse), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival, plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse, immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes. Information on merchandise withdrawn from bonded storage warehouses for exportation (not included in either imports for consumption or general imports) is also availabe for reference purposes.

Trade between the United States and its territories and possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of intransit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report, is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

VALUATION

The values are in general based on market or selling price, and are in general f.o.b. the exporting country. (Transportation costs to the United States may inadvertently be included in the case of merchandise which is not subject to an import duty based on value.) United States import duties are excluded.

COUNTRY OF ORIGIN

The country of origin is defined as the country where the merchandise was grown, mined or manufactured. In the event the importer can not readily obtain information as to the country of origin for a shipment, it is credited, for statistical purposes, to the country of shipment. Countries are reported as defined in Schedule C, *Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics*. Schedule C shows the descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of each country for statistical purposes. It is published as a part of Schedule A (see "Commodity Subgroup Information," below). A separate edition is also available free upon request to the Bureau of the Census. In this report countries are listed according to continents, in sequence within each continent from north to south and west to east, in accordance with their arrangement in Schedule C. The Table of Contents on page 7, which lists the countries in this order, will assist in locating the data for individual countries. The omission of a country name from this report indicates no imports from that country.

COMMODITY SUBGROUP INFORMATION

For presentation in this report, the commodity information compiled in terms of the classifications established in Schedule A, *Statistical Classification of Commodities Imported into the United States*, is summarized into approximately a hundred subgroups of related commodities. It is presented in the order in which the subgroup classifications are numbered in Schedule A. Reference to the table on page 8 will show the subgroup numbers, their unabbreviated descriptions, and the range of numbers of the individual Schedule A classifications included in each. For precise information as to the commodity content of individual subgroups, reference should be made to the descriptions in Schedule A of the numbered classifications included.

To save printing cost, complete country by subgroup information is not shown in this report. For each country, separate information is shown only for those subgroups whose individual totals for that country during the period covered by the report were $10,000 or more. Imports from each country of commodities falling in subgroups with individual totals of less than $10,000 for that country are presented as a combined total for each commodity group. Individual subgroup information for imports reported in these combined totals will be supplied upon request. A charge may be made to cover the cost of preparing this detailed information. The omission of a numbered subgroup under any country indicates no imports from that country, or imports less than $10,000.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report for earlier months of the current and previous year are shown at the back of the current month's report. With the exception of very important changes, any revisions to data for earlier years are held for reflection in the figures to be published in *Foreign Commerce and Navigation of the United States* for that year.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS.

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of *Foreign Commerce and Navigation of the United States*. Regular subscribers to FT reports are automatically supplied with copies of *Foreign Trade Statistics Notes*, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.). A catalog of *United States Foreign Trade Statistical Publications* is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports on a cost basis can also be arranged for to obtain additional detail compiled but not published. For free copies of the "Explanation of Statistics" or the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

**Import data on line labeled "1 TO 250 DOLLARS EST" are estimates based on 5% sample of informal entry and formal entry shipments valued $1-250. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample (shown immediately to the left of the double asterisk (**)) to determine the reliability of the sample, see page 5.

**Import dete on line labeled "1 TO 250 DOLLARS EST" are estimates based on 5% sample of informal entry and formal entry shipments valued $1-250. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk ("*")] to determine the reliability of the sample, see page 5.

**Import data on line labeled "1 TO 25D DOLLARS EST" are estimates based on 5% sample of informal entry and formal entry shipments valued $1-25D. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.
